

PREPARED BY

PREPARED FOR

TWO OPTIONS, ONE INSURER · AUGUST 2026

Full Cover or Vehicles Only

Bryte has quoted your account two ways. This sets both out line by line, and shows what the second option leaves uninsured — including the one thing most people do not expect.

FULL COVER

R42,306/mo

R507,670 a year

VEHICLES ONLY

R15,002/mo

R180,030 a year

WHAT THE FULL OPTION COVERS

● Stock R73.3m

Goods in transit R75m carry

11 vehicles

● Liability R10m

What each one costs, and what it leaves out

Both quotations are from the same insurer, on the same wording, for the same business. The only difference is how much of the account is placed. **Every figure below is taken straight off the two schedules and reconciles to the cent.**

SECTION	VEHICLES ONLY	FULL COVER	SUM INSURED
Fire & allied perils Stock in trade R73,266,429 · contents · installed solar R871,897.	—	R83,151.05	R74,471,499
Goods in transit Road, rail and air. Third-party carriers to 25% of carry.	—	R75,000.00	R3,000,000 / load
Business all risks Testers, phantoms, dose meters, tool bags, stock at client sites.	—	R61,846.44	R1,860,536
Electronic equipment Servers, ~55 laptops, IBA MAGIMIX R276,520, Synapse 3D.	—	R57,509.02	≈R1.1m
Theft — first loss Including malicious damage. Alarm warranty applies.	—	R18,853.51	R504,386
Combined liability General, tenants and work away · products and defective workmanship R5m.	—	R5,576.00	R10,000,000
Accidental damage · machinery breakdown	—	R7,357.90	R639,386
Motor — 11 items Identical vehicles and values on both quotations.	R158,436.82	R145,961.16	R3,893,751
Roadside assist & Office Buddy	R18,660.00	R18,660.00	·
Sasria Statutory, set by Sasria and identical at every insurer.	R2,932.74	R33,754.69	·
Total per year	R180,029.57	R507,669.76	·
Total per month	R15,002.46	R42,305.81	·

ONE CORRECTION TO THE QUOTATIONS

The monthly column on both schedules divides the **Sasria** figures by ten rather than twelve. The correct monthly totals are **R42,305.81** and **R15,002.46**, not R42,868.39 and R15,051.34. We have asked Bryte to reissue. Every other section converts correctly.

Vehicles alone cost you more than vehicles included

Both quotations carry **the same eleven vehicles at the same retail values**. Same third party limit, same excesses, same extensions, same roadside assist. The only thing that changes is the **rate** the insurer applies to the two largest vehicles.

MOTOR – VEHICLES ONLY

R158,436.82

per year

MOTOR – WITHIN FULL COVER

R145,961.16

per year

YOU WOULD SAVE

R12,475.66

a year · 8.5% of the motor section

VEHICLE	RETAIL VALUE	VEHICLES ONLY	WITHIN FULL COVER
Hino 300 814 LWB (AZ3) 2021	R783,833	3.560% · R27,904.45	3.300% · R25,866.49
VW Crafter 50 2.0TDi XLWB 2026	R1,043,770	4.000% · R41,750.80	3.000% · R31,313.10
The other nine items Suzuki, Toyota, VW Polo Vivo, Hino 614, Nissan x2, VW Caddy, Hyundai H100, forklift.	R2,066,148	identical	identical
Motor section	R3,893,751	R158,436.82	R145,961.16

WHAT THIS MEANS FOR THE DECISION

The full programme does not cost R327,640 more than the vehicles. It costs R340,116 of additional cover, less R12,476 you get back on the vehicles you were buying anyway. Put differently: if you place only the vehicles, you pay **R12,475.66 a year extra** for exactly the cover you would have had for less as part of the whole account.

ALSO CONFIRMED ON THE FULL QUOTATION

Motor accessories are included in the sum insured per vehicle where applicable and will reflect on the final schedule. Third party liability **R5,000,000**, passenger and unauthorised passenger liability **R2,500,000** each, contingent liability and parking facilities **R5,000,000**, credit shortfall on the Suzuki Swift, Toyota Starlet and VW Crafter.

What would be left uninsured

This is not an argument for spending more. It is a list, so that whatever you decide, you decide it knowing what sits outside the policy.

THE FOUR THAT MATTER MOST

- **R73,266,429 of stock in trade.** Your imported machines, at your premises. This is the single largest figure anywhere in your programme and it is the whole fire section.
- **R75,000,000 of annual carry, R3,000,000 per load.** Machines in transit by road, rail and air — including on third-party carriers up to a quarter of the carry.
- **R10,000,000 of liability,** including work away, plus **R5,000,000 of products and defective workmanship** — the cover that answers when an installation you completed causes harm.
- **R1.86m of test equipment and roughly R1.1m of electronics** — the Unfors tester, the QA equipment, the phantoms and dose meters, the IBA MAGIMIX, Synapse 3D and about fifty-five laptops.

THINGS WORTH FIXING EITHER WAY

- ✓ **Stock at your customer's site** is covered for a **maximum of four weeks** after delivery and **excludes accidental damage**. Installations often run longer. We are asking for the period extended and accidental damage added.
- ✓ **There is no business interruption cover** on either quotation, because it was not asked for. With R73m of stock, one address and import lead times, we would like to quote it.
- ✓ **Reinstatement of data R10,000** and increased cost of working R10,000 are low for a medical imaging business. Both can be increased.
- ✓ **Wreckage removal R10,000** is light for a Hino. We have asked for it lifted.

OUR RECOMMENDATION

Place the full programme. Insuring eleven vehicles worth R3.89 million while leaving R73.3 million of stock and R75 million of annual carry uninsured is not a smaller version of the same programme — it is a different one, and it does not cover the way your business actually loses money. If budget is the constraint, tell us the number and we will build the programme around it rather than cut it at the vehicles.

Before either option is bound

WITH THE INSURER

1 The retroactive date, in writing

The liability section is headed "retroactive date: inception" and then states your date of 1 June 2017 is retained. We have confirmation it is retained — but the schedule must be corrected before inception, not after.

2 Turnover and wages

The liability section currently shows both as zero. It is rated on those figures, so it would be re-rated after inception. We would rather have the real numbers now.

3 The monthly column and the Sasria categories

Reissue with the correct monthly figures, and confirm the Sasria vehicle categories — the schedule shows nothing against commercial vehicles over 3,500kg, yet two Hinos are on the fleet.

4 The insurer's name on the document

Every page footer reads "Hollard Insurance Company" on a Bryte-titled quotation. We want that confirmed in writing before anything is signed.

BOTH QUOTES SUBJECT TO

Survey & claims

A satisfactory survey before inception and a full three-year claims history. Until both are in, either premium can move.

ALARM WARRANTY

Theft & electronics

Both sections carry an alarm warranty on the risk premises. Please confirm the specification, that it is serviced, and that it is armed out of hours.
