QUOTATION REVIEW · NOT YET A COMPARISON

Arboretum Briefing

We cannot compare yet, because the current schedule arrived with its figures removed. **So here is everything the ONE quote actually buys, read line by line, and the eight questions that turn it into a comparison.**

ONE QUOTED

R24,093/mo

reconciles exactly

CURRENT

unknown

THE GOOD NEWS

Buses R5m

passenger liability

Where this actually stands

✗ WHY THERE IS NO COMPARISON IN THIS PACK

The current Santam schedule you sent is a **34 page scan stored as a pure black and white image**. I checked the pixels: the whole file contains exactly **two values, black and white, with no grey at all**. Any figure that was faint has been rounded to white and **no longer exists in the file**. It is not recoverable by any means, and I would not spend more time on it.

There are also no hidden layers: no annotations, no form fields, no white boxes over live text. It is a flat scan.

🧠 AND A JUDGEMENT CALL, WHICH IS ANNE'S

You mentioned the school pays around **R30,000**. **We are deliberately not building on that figure**. Two reasons. It is not off a schedule, so a proposal quoting a saving to the rand would be built on sand. And if the figures were taken out before the document reached you, that may well have been intentional. **Working around that would be the wrong thing to do and it is not necessary**. Ask for the number properly instead.

WHAT TO DO, IN THIS ORDER

1

Ask Marsh directly for the schedule as a native PDF. Contact is **Ronel Irvine, Ronel.Irvine@marsh.com, 082 605 8718**. She produced it, so she can re-send the original rather than a scan of a print.

2

If the school would rather not share the premium, that is their right. Then ask only for the **sums insured and the section list**. Those matter more than the price, and a school is far more likely to hand them over.

3

Meanwhile put Play 04 to ONE. Eight items, none of which need the current policy. Getting those answered moves the file whether or not Marsh co-operates.

4

Do not present a price to the school yet. We can tell them what ONE covers. We cannot yet tell them whether it is better or cheaper, and saying so is what makes the eventual answer credible.

What R24,093.16 actually buys

ONE Educational Policy **EDU/1294794**, One Underwriting Managers, underwritten by **Old Mutual Alternative Risk Transfer Insure (OMART, FSP 49551)**. Signed 25/08/2026. Every figure below is taken off the schedule and every section total reconciles.

SECTION	SUM INSURED	MONTHLY	WHAT IS IN IT
Electronic equipment	R4,280,783	R7,134.64	Desktops and software R1,885,100 · printers R1,699,778 · CCTV R150,000 · 36 leased Intel NUCs R499,905 · Taskalfa R46,000
Motor	retail value	R4,872.66	3 buses , 1 GWM Steed LDV, 2 Massey Ferguson tractors, 4 trailers
Buildings combined	R45,875,277	R3,822.96	R40,000,000 and R5,875,277, plus rent at 25% of R11,468,819
Business all risks	R685,315	R3,367.84	Robotics lab laptops R346,479 · laptops R138,637 · 16 marimbas R120,000 · generator, AV, gardening machinery
Contents	R5,979,917	R752.53	The current policy has Office Contents switched off. This is new cover.
Broadform liability	R20,000,000	R450.00	Public liability
Fire	R2,747,490	R291.25	Library books and media centre R1,747,490, stock R1,000,000
Money	R50,000	R166.65	A school that collects fees. See Play 03.
General	n/a	R50.00	Policy fee
Glass	R10,000	R33.33	Ten thousand rand of glass, on a school. See Play 03.
Accidental damage	R20,000	R16.67	Very low for a property programme of this size
Employers liability	R5,000,000	R5.00	
Insurer total		R20,963.53	plus Sasria R3,129.63
All in, per month		R24,093.16	VAT R3,142.60, commission R4,075.81

✓ ONE THING THAT IS GENUINELY REASSURING

The proposal page records "**Has the three year claims history been submitted to ONE? Yes**", and names Santam and policy 77115603*002 as the previous insurer. **So this price has been struck with the claims record on the table.** That is not always the case, and it means R24,093.16 is far less likely to move at underwriting than a quote marked "to be advised".

The three buses, and five things to query

✓ THE BEST THING IN THIS QUOTE, AND YOU SHOULD LEAD WITH IT

The school runs **three buses**: a 2013 Iveco 50C15V15 midibus and two Toyota Quantum 14 seaters. On the ONE quote each one carries **passenger liability of R5,000,000**, under a bus and coach specific extension, plus **third party liability of R5,000,000**.

That is better than two other passenger operators we have reviewed this year, both of whom sat at R2,500,000. On a vehicle carrying other people's children to school, this is the single most important line in the policy, and ONE has it right. **Check what the current Santam policy gives on the same three buses, because that is where this deal will be won or lost.**

🔍 QUERY 1 • GLASS AT R10,000

A primary school has a great deal of glass and children in it. **R10,000 would not replace the windows on one classroom block.** This looks like a placeholder rather than a considered figure. Ask what the real replacement value is.

🔍 QUERY 2 • PRINTERS AT R1,699,778

Printers are insured for **almost as much as every desktop, laptop and piece of software in the school combined** (R1,885,100). Possible, but improbable. **Get the asset register behind that line**, because if it is mislabelled the electronic equipment section is mis rated, and it is the largest premium line on the quote.

🔍 QUERY 3 • MONEY AT R50,000

A school collects fees, runs tuck shops and holds fundraising events. **R50,000 is thin**, and there is **no fidelity cover at all** (see below). Ask what cash is actually held and moved.

🔍 QUERY 4 • ACCIDENTAL DAMAGE AT R20,000

Against a property programme of R59.6 million. Ask for it to be lifted, it is inexpensive cover.

🔍 QUERY 5 • THREE SECTIONS ARE MISSING FROM BOTH POLICIES

No theft. No fidelity. No business interruption. They appear in ONE's generic excess schedule but carry no sum insured and no premium, so they are not taken. **The current Santam policy does not have them either**, which I could confirm from the one page of the scan that survived.

So these are **standing gaps rather than regressions**, and that is the right way to raise them. **Fidelity is the one I would push**: a school handles fees, and employee dishonesty is the characteristic loss of the trade. Nobody has ever put it to them.

Eight questions, and who to ask

TO ONE, BEFORE ANYTHING IS PRESENTED

1 • The insured is wrong, and this is the most important item on the page

The current Santam policy names **three parties: Arboretum Primary School, Arboretum Pre-Primary School and FTRRI**. The ONE quote names only **Arboretum Primary School**. A claim by an entity that is not a named insured does not get paid. Get all three named in writing before this goes anywhere near the school.

2 • There is no inception date

Inception and endorsement both read **01/01/3000** and payment reads **TBA**. That is a system placeholder. We saw exactly the same thing on the ONE quote for Gear Lab, so it appears to be how ONE issues an unaccepted quote, but it still means no start date is set. Also note the quote says renewal **01/08/2027** while the current policy anniversary is **01/04/2027**. Confirm which applies and time the cancellation so there is no gap and no double debit.

3 • Overnight parking, within 21 days

The motor section carries a condition that **overnight parking arrangements must be disclosed within 21 days**. On three buses parked at a school overnight, this is not a formality. Get it declared and accepted in writing rather than discovering it at a claim.

4 • The surge protection condition

The power surge excess is 10% of claim with a minimum of R2,000 **only if the main distribution board is protected by surge protectors installed by a qualified electrician and certified compliant with SANS 10142-1**. With R4.28 million of electronic equipment and R59.6 million of property, find out whether that certificate exists. If it does not, an electrician's morning fixes it. Endorsements **SANS 0007** and **SANS 0018** attach to this.

5 • Survey endorsements

The quote carries **SURV 0006** and **SURV 0016**. Ask what the surveyor will require and whether the quote is conditional on a satisfactory survey, so a requirement does not land after the school has agreed to move.

6 • Price theft, fidelity and business interruption

All three are absent from both policies. Get them quoted so the school can decide rather than inherit the omission. Fidelity first.

7 • Glass, money and accidental damage

R10,000, R50,000 and R20,000 respectively. Confirm these are considered figures and not defaults, and re quote on the real numbers.

TO MARSH, OR TO THE SCHOOL

8 • The current schedule, properly

A **native PDF** rather than a scan, from **Ronel Irvine at Marsh, Ronel.Irvine@marsh.com, 082 605 8718**. If the premium is not something they wish to share, ask instead for the **sums insured, the section list and the passenger liability limit on the three buses**. Those three things alone would let us tell the school something worth hearing, and they are far easier to ask for than a price.

HOW TO PUT IT TO THE SCHOOL

"I have read the ONE quote properly rather than just the price. It does one thing better than I expected, which is five million of passenger liability on each of your three buses, and there are about five figures on it I think are placeholders rather than real numbers. Before I tell you whether to move, I need to see your current sums insured. If you would rather not share the premium, that is completely fine, the sums insured are the part that actually matters."
