FIRST INSURANCE PROGRAMME · AUGUST 2026

Your Cover, From Scratch

Two markets approached and read line by line. Both are workable — and both need the same two things added before we would let you sign either.

HOLLARD

R3,731/mo

quote QT1026483

ONE

R2,718/mo

quote ONEC/1293516

COVERED

● Stock R5.2m

Buildings

● Customers' vehicles

Liability R4m

What each one costs and covers

You are insuring a gearbox and clutch workshop for the first time, so there is no existing policy to measure these against. What we can do is read them against each other and against **what your business actually does** — which is where the important part of this document is.

SECTION	HOLLARD	ONE	SUM INSURED
Fire Stock, plant and machinery, and the building.	R1,520.84	R832.50	R5,550,000 contents
Buildings Quoted inside the fire section by Hollard, separately by ONE.	incl.	R353.16	see page 04
Theft	R583.34	R333.33	R100,000
Liability Hollard combined liability, claims-made. ONE broadform.	R496.67	R325.00	R4,000,000
Motor traders Customers' vehicles in your care. See page 03.	R500.01	R577.50	R50,000 damage
OfficeBuddy • general	R225.00	R2.08	.
Sasria Statutory. Identical rates at every insurer.	R330.65	R294.72	.
Broker fee	R75.00	—	.
Total per month	R3,731.48	R2,718.29	.

ONE THING WORTH KNOWING ABOUT THE FIGURES

The two insurers agree exactly on your contents. Hollard's plant and machinery of R350,000 plus stock of R5,200,000 comes to R5,550,000, which is ONE's fire sum insured to the rand. They were given the same information and priced it differently — which is what a market exercise is for.

BEFORE YOU READ PAGE 03

ONE is **R1,013.19 a month cheaper**. We are not recommending it on that basis yet, because the section that matters most to your business is incomplete on **both** quotations.

Neither quote covers a car on your hoist

Your business is taking a customer's vehicle, putting it on a hoist, and working on the gearbox. **That is the whole risk.** Both quotations include a motor traders section — and both have the two extensions that describe your actual work switched off.

MOTOR TRADERS COVER	HOLLARD	ONE
Vehicle hoists and ramps Damage happening through the use of a hoist.	Not included	Included
Damage to vehicles being worked upon Damage to the car while you are working on it.	Excluded by the wording	Not included
Contingent liability	Not included	Included
Damage to customers' vehicles The most it will pay.	R50,000	R50,000
Third-party liability	R2,500,000	R2,500,000
Theft of vehicle parts · loss of keys	—	R10,000 · R20,000

WHAT THE HOLLARD WORDING ACTUALLY SAYS

"The company shall not be liable under this section in respect of loss, damage and/or injury occurring by or through the use of any vehicle hoist or vehicle ramp **unless otherwise stated in the Schedule.**"

It is not stated. "Vehicle hoists and ramps" reads **No** on all four items. The same section also excludes "defective workmanship or consequential loss as a result thereof to any vehicle in or on the premises".

AND WHAT THE ONE SCHEDULE SAYS

Car hoists **are** included, which is better. But the internal risk records "**Damage to vehicles being worked upon: NO.**" That is the sentence that describes what you do for a living.

WHAT WE ARE DOING ABOUT IT

We have gone back to **both** insurers to have those two extensions quoted, and we will not put a final recommendation in front of you until we have them.

We are also asking you one question: what is the highest total value of customers' vehicles standing at your premises at any one time? **R50,000 will not replace one modern SUV**, and a workshop of this type usually has several cars in at once. That limit needs to be set from your yard, not from a template.

Details that decide whether a claim pays

1 • THE TWO QUOTATIONS NAME DIFFERENT COMPANIES

Hollard insures "**Gear Lab**", registration 2000/260824/07. ONE insures "**Gear Lab Roodepoort (Pty) Ltd**", registration 2025/509941/07 — one registered in 2000, the other in 2025, at the same address.

Insuring the wrong company means there is no cover when you claim. Please confirm which entity trades, employs the staff, and takes the customers' vehicles in. We will put that name on both. The VAT number on the Hollard quote also needs correcting — the figure shown is not a valid South African VAT number.

2 • THE TWO INSURERS DISAGREE ABOUT YOUR BUILDING

Hollard insures the building at **R1,750,000**. ONE insures it at **R2,555,000**. That is a **R805,000** difference on the same premises, and only one of them can be right. Please confirm what it would cost to rebuild it today — if the figure is too low, a partial claim is reduced proportionally.

3 • BOTH INSURERS HAVE ASKED FOR SOMETHING YOU DO NOT HAVE

ONE's approval makes the start of cover conditional on receiving a **satisfactory claims history** and your **previous insurance policy schedule**. You have not been insured, so neither exists. That is not a problem in itself — but an insurer prices an uninsured business differently from one changing insurers, and **we would rather they confirm the price knowing that now than revisit it after you have signed**. We are putting it to them in writing.

4 • WHAT NEITHER QUOTATION INCLUDES

Worth knowing, so the decision is yours rather than an accident of what was quoted: **no business interruption** (if the workshop burns, the income stops and the salaries and rent do not) · **no machinery breakdown** on your hoists, presses and benches · **no electronic equipment** cover for diagnostic gear · no money, glass, fidelity or goods in transit · and **no cover for any vehicle Gear Lab owns**. Tell us whether you run a bakkie or a recovery vehicle and we will add it.

Of those, business interruption is the one we would most like to quote — you carry R5,200,000 of stock at a single address.

What happens now

OUR SIDE

- 1 Both extensions quoted, both markets**
Damage to vehicles being worked upon, and vehicle hoists and ramps.
Until we have those, neither policy answers your main exposure.
- 2 We tell both insurers there is no prior cover**
In writing, before you accept, so the price you see is the price you pay.
- 3 Business interruption and machinery breakdown priced**
Along with electronic equipment, so you can see what a complete programme costs and decide what you want in it.
- 4 One recommendation, with reasons**
We come back with a single recommended programme, the corrected limits, and a written note of anything it does not cover.

GEAR LAB — NAME, CAPACITY & DATE

YOUR SIDE — FOUR ANSWERS

- ✓ **Which company** is the insured, and its VAT number.
- ✓ **What the building would cost to rebuild** today.
- ✓ **The highest value of customers' vehicles** on the premises at one time.
- ✓ **Any vehicles Gear Lab owns**, with registration numbers and values.
