

GATEWAY SCHOOL AND SOCIETY · INTERNAL · 15 SEPTEMBER 2026

Gateway Playbook

For Phillip Van Wyk. Four quotes against the real policy. The cheapest quote is short R19.5m of rent cover, the one we recommend has passenger liability switched to the wrong vehicle class, and the client is in breach of a tracking warranty today.

RECOMMEND

King Price

R42,901.67, one fix first

CORRECT

Bryte

rent quoted at one tenth

BENCH

Alpha · A&G

no liability · dearer than staying

Four quotes, one real benchmark, and it is not who you think

The incumbent is **Old Mutual Insure**, product OMI-Multisure 2024.4, policy **MUF-PWV0680-M-0208559**, through **PWV Insurance Brokers** (FSP 22500), broker **Gerda Baker**, underwriting Tamaryne Whitfield, administered by Broker Solutions Group. **On risk since 01/09/2010**, so sixteen years. Review date **01/09/2026**, **already rolled**. Ask PWV whether anything moved at review, because our figure is off the 11 August print.

QUOTE	ALL-IN MONTHLY	VS CURRENT	PER YEAR
CURRENT OLD MUTUAL INSURE / PWV	R46,640.87		
Bryte via BrokerBuddy Specialised FSP 17703, QT1029228	R41,359.96	-R5,280.91	-R63,371
FSP 43862, COM58558			-R44,870
Alpha ALPHACOM204975, FSP Commercial On-Line, Guardrisk	R45,539.16	-R1,101.71	-R13,221
Auto & General FSP 16354	R46,795.48	+R154.61	+R1,855

Current reconciles: premium R45,936.34 + Sasria R657.77 + Sasria shortfall R46.76 = R46,640.87, VAT R6,083.59, total fees R0.00. All four quotes reconcile to the cent too.

TWO QUOTES ARE OUT ON THEIR OWN FINDINGS

Auto & General is DEARER than staying. R154.61/mo more, and it drops the R20m umbrella, cuts property owners' liability to R1,000,000, and has no employers' liability, fidelity or glass. Nothing to discuss.

Alpha quotes NO liability section at all. Broadform, directors and officers, commercial umbrella, **trustees liability**, personal, extended personal, every one reads "Not included", against a current policy carrying R5m broadform plus a R20m umbrella, on an NPO with a governing body. It saves R1,101.71 and deletes R25,000,000 of liability. Bench it.

BUT KEEP ALPHA ON THE TABLE FOR ONE REASON

Alpha quoted the same 21 buses and gave **passenger liability R2,500,000 at a NIL excess on 19 items and R5,000,000 on three**, plus unauthorised passenger R2,500,000 nil excess on all 22. **That is your proof to King Price that the cover is obtainable on these exact vehicles.** Do not show Alpha to the client as a contender. Use it as evidence.

Bryte has dropped a zero on the rent item

BUILDINGS COMBINED, SUB-SECTION C, RENT	SUM INSURED
CURRENT OLD MUTUAL INSURE	R21,677,345
King Price, "rent and alternative premises", 12 months	R21,677,345 ✓
Auto & General, "loss of rent"	R21,677,344 ✓
Bryte	R2,167,734

R21,677,345 divided by ten is R2,167,734.50. It is the client's own figure with a zero missing. **Short R19,509,611.**

WHY THIS IS THE PLAY, NOT A FOOTNOTE

Bryte is the cheapest quote by R1,541.71 a month against King Price, and part of the reason is that it is not quoting the same policy. **Do not present Bryte's price until it is corrected and re-rated**, because the corrected number is what the client would actually pay and it will not be R41,359.96. **Same shape as the Vuyos Santam find**, where Santam had R15,000,000 of buildings at Robertville down as R1,500,000 and the entire gap against two other quotes was that one item.

TWO MORE CORRECTIONS FOR BRYTE IN THE SAME EMAIL

Transposed registrations. Item 5 reads **XYG685GP**, the vehicle is **YXG685GP**. Item 13 reads **HG38XBGP**, the vehicle is **HG38BXGP**. Confirmed against both the current asset register and the Alpha quote. A wrong registration is worse than a blank one, it looks complete.

Re-rate the account as a school. Bryte's liability section records **"Industry: Unspecified"**. That single field is why it has no teacher liability, no pupil liability and no schools extensions, and why it is cheap. Put it to them as a re-rate, not a complaint about price.

CORRECTION TO THE PACK YOU MAY ALREADY HAVE SEEN

An earlier draft said Bryte and Auto & General were under-insuring the buildings by R13.6m and R18.3m. **That was wrong and it has been withdrawn.** All four carry base buildings at **R86,709,378 to the rand**. The R104,968,348 on the current schedule is that base plus **R18,208,970 of 1st and 2nd year inflation escalation margins** plus R50,000 of geysers. What **is** true is that the escalation margins are thinner on every quote: King Price carries R8,670,938, one year only. Ask all of them to match both years.

Second time this insurer has printed a limit that does not fit the vehicle

On all 25 King Price vehicle items: **"Passenger liability: Private and LDV only R3,000,000"** and the same on unauthorised passengers. The fleet is 21 Toyota Quantum Sesfikile 15 and 16 seaters.

YOU NOW HAVE DOCUMENTARY PROOF, WHICH YOU DID NOT HAVE BEFORE

The **current Old Mutual schedule classifies these vehicles as "MIDI-BUS (seats incl driver not exceeding)"** and rates them for Sasria as **"Category M3, Minibus, 16 passengers including driver"**. Class of use **Commercial**.

And it already gives, inside the premium, on every bus: **passenger liability R2,500,000, unauthorised passenger liability R2,500,000, contingent liability R2,500,000**.

So King Price is not failing to add cover. It is taking away cover the school already has, and printing a bigger number where the working one used to be. That is the sentence to use.

THE PRECEDENT, FOR YOU NOT FOR THEM

Wes-Kaap Busdiens. King Price via VAPS quoted a scheduled bus operator and printed passenger liability on an **e-hailing RTU form** that would not have answered for commuter, scholar and charter work. We caught it per item on page 10, not off the summary. **Same insurer, same shape, different wording.** Keep the precedent internal. Put it to King Price as a question about this schedule.

SEND EXACTLY THIS

"Please confirm in writing that passenger liability and unauthorised passenger liability under COM58558 respond in respect of Toyota Quantum Sesfikile 15 and 16 seater minibuses used for scholar transport, or reissue the schedule with the 'Private and LDV only' restriction removed and the limit stated per vehicle. For reference, the insured's current schedule classifies these vehicles as MIDI-BUS and rates them Sasria Category M3 Minibus, and a competing quote on the identical fleet offers R2,500,000 passenger liability at a nil excess."

Verbal confirmation is not enough. The restriction is printed 25 times. Only a reissued schedule or an underwriter's letter undoes it.

AND THE REASON YOU STILL WANT KING PRICE

The current policy prints **"Schools extension: No"** and **"Cancellation of special event extension: No"**. So King Price's teacher liability, pupil liability including pupil-to-pupil, R1,000,000 PI covering wrongful expulsion of a scholar, post-traumatic counselling and event cancellation are **genuinely new cover, not a match**. Its R25,000,000 limit matches the current R5m broadform plus R20m umbrella. **Match on limit, gain on scope, for R3,739 a month less than today.** That is the deal, once the buses are fixed.

They are in breach of a tracking warranty today

This is the strongest telematics lead in the book and it is not a new-insurer condition. It is on the policy they already hold.

EVERY BUS ITEM ON THE CURRENT SCHEDULE

Gearlock: No · Immobiliser: Factory Fitted · **Tracking 1: Early Warning System Required** · Drivecam: No · Data Dot: No · **Alarm system: None**

and under Warranties and Endorsements, on every item: **"Vehicle Recovery System (the Device) Warranty and Memorandum"**.

Required, recorded as absent, and written as a WARRANTY. A breached warranty is the cleanest ground an insurer has to decline. 24 of 25 vehicles, carrying special-needs children.

INSURER	WHAT IT REQUIRES	WHAT IT COSTS THEM NOT TO HAVE IT
Current OMI	Early warning system required, vehicle recovery system warranty	Breach of warranty
Bryte	"Early warning system required" on 21 of 25 items; one Netstar unit only	Theft cover argument
King Price	Immobiliser or tracking on all; tracking over R500,000; tested every 6 months	+25% of the claim as extra excess
Auto & General	Theft excess R5,600 or 7.5% of value, whichever is higher	Waived entirely if fitted , about R33,750 on a R450k Quantum

HOW TO SELL IT WITHOUT SELLING

Read Auto & General's own sentence off their quote: the theft excess falls away if a tracking device is fitted. Then read the current schedule's warranty. You are not pitching, you are pointing at two documents the client already owns. **24 units to fit, one Netstar to convert.** And the non-insurance reason lands harder with a governing body: live location and driver scoring on buses carrying special-needs children is what a parent asks about.

ALSO WORTH KNOWING

Group personal accident on the current policy covers **25 bus drivers** by name of occupation, R50,000 death and R50,000 permanent disability each. **Bryte has no GPA section at all.** If Bryte ends up the answer, that has to be added back.

The standing gaps, and the admin to clear

GAPS THAT ARE THE CLIENT'S TODAY, NOT A QUOTE'S FAULT

Every one of these reads "No" or absent on the **current** policy, which is why every quote shows the same:

Employers' liability (teaching and support staff) • **fidelity guarantee** (fees, tuck shop, fundraisers) • **glass** • **business interruption at R297,000**, a figure copied onto all four quotes • deterioration of stock • accounts receivable • directors' and officers' liability • employment practices liability • goods in transit • products liability and defective workmanship • negligent advice • statutory defence costs • wrongful arrest • defamation.

Quote fidelity and employers' liability next. Neither PWV nor anyone else has put them in front of this school.

WHAT THE CURRENT POLICY DOES CARRY THAT IS EASY TO MISS

Pollution liability R5,000,000 inside the broadform, at R17.28 a month. **Third party vehicles extension R1,000,000** and a **provider of food and drink extension** for the tuck shop. A **solar system at R1,752,411** inside the R9,635,900 fire sum insured. A borehole pump and motor on machinery breakdown. Buildings basic excess R25,000. Sasria type on the buildings is recorded as **"Residential"** on a school, worth a question.

ADMIN TO CLEAR BEFORE ANYTHING IS BOUND

VAT number is blank on the current schedule AND the Bryte quote reads 9517532, seven digits, where a South African VAT number is ten starting with a 4. Get the real one, it is needed for Sasria anyway.

Review date 01/09/2026 has already rolled. Our benchmark is the 11 August print, version 22. Ask PWV for the current version before the client is given a saving figure.

Alpha has not quoted the three trailers (Venter Traveller R32,000, Venter Elite R12,500, flat bed R10,000). Auto & General quotes 22 items against 25. Only Bryte and King Price cover the whole asset register.
