

RM PLAYBOOK · IMPACT DISTRIBUTORS / BANDINI CHEESE · 7 OCTOBER 2026

No Benchmark. No Load Cover. Get Both.

VAPS has quoted the whole fleet at **R219,941.79 a month** and it reconciles to the cent. But without the current schedule we cannot say it saves anything, and **the quote has no goods in transit on a food distributor**. Sell the review, not the price.

A clean quote with nothing to compare it to

VAPS54248, printed 7 Oct, **Renasa paper** (not King Price, as on Skip-a-Way and CS Continental: VAPS writes on both). Non-specified fleet: nine groups, a count and a total, no registrations. Reconciles exactly.

LINE	UNITS	R/MONTH
Motor fleet, 9 groups, R67,419,000 HCV, trailers, SUV, LDV, cars 3.75% · trailers 2.00% · bus 2.50% · tractors 1.00% · special types and implements 0.75%	155	167,277.09
VAPS roadside assist listed as H 42, A 16, M 8, S 19; trailers, plant and bus excluded	85	23,270.00
Sasria commercial 19,123.96 + private (cars and SUVs) 70.74		19,194.70
Windscreen, R15,000 a vehicle R120 x 85; printed as "FLEET Item 1, 12", which is the farm implements	85	10,200.00
All-in R2,639,301.48 a year		219,941.79

WHAT WE EARN, AND THEY WILL ASK

Broker commission **R24,392.04 a month = R292,704 a year**, 12.15% of the premium before Sasria. VAPS takes a 10% binder fee from Renasa on top. Broker fee and admin fee R0.00. It is disclosed on the quote, so expect the client to have seen it.

WHO THEY ARE, FROM THE QUOTE ITSELF

12 farming implements, 7 tractors and 18 "special types" beside 42 trucks and 32 trailers: **a cheese maker with a farm and its own distribution fleet**. 19 SUVs averaging R610,211 look like directors' and managers' cars. VAPS calls them a "Transport Contractor". That is wrong and it matters (Play 04).

TELL THE CLIENT THIS, IN THIS ORDER

"Ons het 'n volle fleet quote van VAPS, maar sonder julle huidige skedule kan ek nie vir julle sê of dit goedkoper is nie. Wat ek wel kan sê, is dat die quote nie julle loads dek nie, en dat julle claims history wys dat diefstal julle grootste risiko is."

IF THE CLIENT SAYS "WE CANNOT GET THE SCHEDULE"

Ask for the latest **debit order amount and insurer name** instead. Even that lets us say whether R219,942 is in the right range. A broker letter of authority to the current broker also gets the schedule in a day.

CROSS-CHECK AGAINST THE FLEET LIST YOU SENT FSP

VAPS GROUP	UNITS	SUM INSURED	AVERAGE	CHECK ON YOUR LIST
HCV	42	26,190,000	623,571	count and total tie?
Trailers	32	19,346,000	604,563	reefer bodies included?
SUVs	19	11,594,000	610,211	whose cars?
Special types	18	4,355,000	241,944	what are they?
LDV / cars / bus	25	4,230,000	169,200	bus seats?
Tractors / implements	19	1,704,000	89,684	road use?

The trucks are insured. The cheese is not.

ON THE FACE OF THE QUOTE

Goods in Transit: Not taken. GIT excess reducers not taken. GIT 24/7 Assist not taken. The VAPS proposal form section 5 (commodities, load limit per truck) is blank. With **R1,876,816 of theft** in their claims, the hijacked load is the loss they are most likely to have.

ASK FIRST

- **Is GIT on another policy today?** If yes, get that schedule too; the comparison is incomplete without it.
- **What is a full load worth?** Cheese per truck, highest single load.
- **Refrigerated?** If so, ask for **deterioration of stock / refrigeration breakdown** on GIT. That is the characteristic loss for a food distributor (same instinct as CS Continental).
- **Own goods only, or also other people's?** Changes the GIT wording and the business description.

THE VAPS RULES THAT COME WITH GIT

- GIT load limit **R1,200,000 or more**: independent tracking units on **both trailer links**, wired, 5-day battery backup, trailer disconnect alerts.
- Theft and hijack on GIT only pays with the approved tracking in place, same as the vehicles.
- VAPS wants a full description of goods. "General goods" is not accepted.

ALSO NOT ON THE QUOTE	WHY IT MATTERS HERE	ASK VAPS
Increased third party	R2.5m, and R1m for fire, on 42 trucks	Price R5m incl. fire
Passenger liability	One bus, probably staff transport	Price it on the bus
Excess reducers	Truck excess min R30,000 (Play 03)	Price OD, theft, TP
Credit shortfall	Unknown how many are financed	After the fleet list
Truck hire	A distributor with a truck off the road loses deliveries	Optional, price it
Pollution (Envirosure HAZ)	Not relevant unless they carry fuel	Only if they do

GIT DATA SHEET: GET THESE FROM THE CLIENT BEFORE YOU ASK VAPS

- ☐ Commodity, exact (cheese, dairy, chilled)
- ☐ Annual carry (rand value moved a year)
- ☐ Own goods only, or customers' too
- ☐ GIT claims in 3 years, if any
- ☐ Highest value on one truck
- ☐ Refrigerated trucks and trailers: how many
- ☐ Routes and provinces, any cross-border
- ☐ Current GIT insurer and limit

THE UPSELL IN PLAIN SIGHT

A motor quote is a third of a food business's insurance. Premises, cold rooms, stock, machinery breakdown on refrigeration, deterioration of stock, business interruption, and **products liability** (a cheese recall) are all outside it. Ask where those sit today and offer to quote the whole account.

IN THE ROOM

"As een van julle trokke gehijack word, betaal die polis vir die trok, maar nie vir die kaas agterin nie. Waar is julle loads vandag verseker? Want dis die eerste ding wat ek wil regkry."

Half a million of their own money, and a tracking lead

Claims as you sent them to FSP on 5 Oct: **R3,843,726.04**. No reducers on the quote, so the standard VAPS excess applies.

CLAIM TYPE	CLAIMED	EXCESS BASIS	EXCESS, AT LEAST
Theft / stolen vehicles	1,876,816.18	15%	281,522.43
Own damage, recovered from TP excess refunded when recovered	1,711,448.16	10%	171,144.82
Trailer roof struck while parked	170,601.76	min R30k	30,000.00
Own damage only	27,423.96	10%	2,742.40
Windscreens	57,417.98	20%	11,483.60
Possible TP damage	18.00	–	–
Total	3,843,726.04		496,893.25

THE LOSS RATIO, IF IT IS 3 YEARS

R3.84m over 3 years is **R1.28m a year against R2.64m of VAPS premium, about 49%**. Workable, which is probably why VAPS quoted the whole fleet. But **we do not know the period**, and the price is "subject to 3 years written claims". If the written record is worse, the rate moves. Get the dates from the client before you present a number as firm.

THEFT IS 49% OF EVERYTHING

VAPS will not pay a theft or hijack claim on anything over R200,000 without approved tracking with recovery, working, paid, and monitored 24 hours. On the group averages that is **42 trucks, 32 trailers and 19 SUVs = 93 units**, more once the special types and bus are counted (up to about 112). Trucks over R800,000 on medium or long haul also need **two-camera video telematics**.

FIVE QUESTIONS ABOUT THE CLAIMS

- **Which years?** Everything about the price depends on the period.
- **How many theft claims** make up R1,876,816, and were the loads stolen too?
- **How much of the R1,711,448 was actually recovered** from third parties?
- **The trailer roof, R170,602:** low bridge or depot? A driver training point either way.
- **Any GIT, liability or property claims** on other policies we have not seen?

THE CARTRACK PLAY, AND IT IS REAL

This is a **93 to 112 unit lead** where tracking is a condition precedent, plus video telematics on the bigger trucks and trailer units on 32 trailers. Find out what is fitted today, by whom, and whether it is monitored. The theft history says whatever is there is not working well enough.

IN THE ROOM

"Amper die helfte van julle claims is diefstal. VAPS betaal nie 'n diefstal eis op 'n voertuig bo R200,000 sonder 'n werkende tracker met recovery nie. Kom ons kyk eers wat op die trokke en trailers is, voordat ons enigiets teken."

Six things wrong, two things to ask

ITEM	WHAT THE QUOTE SAYS	FIX
Agreed value	Not stated anywhere. You sent FSP a fleet list "with values for agreed value". Wording 2.15.1.3: agreed value only if stated in the schedule, capped at retail + 20% , revised every anniversary or it reverts to retail.	Agreed value written in, per vehicle, from the fleet list.
No vehicle list	Non-specified fleet. Clause 3.26: annual declaration, premium adjusted at 50% of the annual rate on the difference in count.	Attach the fleet list; check the group totals tie to it.
Insured's name	"Impact Distributots (Pty) Ltd". Reg and VAT blank.	Correct name, reg, VAT. Bandini Cheese as trading name?
Business description	"Transport Contractor".	Food producer and distributor, own goods (and others', if so).
Inception	01/10/2026, a week before the quote was printed.	Reset; time the cancellation of the current policy.
Windscreen description	"FLEET Item 1, 12" (the farm implements) at R10,200, which is R120 on the 85 road vehicles.	Reprint against the right items.

ASK 1: HAIL ON VEHICLES PARKED IN THE OPEN

Page 18, the Renasa commercial excess table, under "Motor Dealerships, Importers, **Fleet owners**": hail excess R1,500 under carports or nets, and **"Vehicles in the open not under carports or hail nets: not covered"**. It sits in a generic table "applicable if not otherwise stated" and is probably aimed at motor traders' stock, but **155 vehicles in a Robertsham yard in a Gauteng summer** is exactly where it would bite. Get it in writing that it does not apply to the Motor Fleet section.

ASK 2: THE NIGHT LOADING

HCV table: **+5% of the claim between 23h00 and 04h00**. Food distribution trucks often leave before dawn. Find out the shift pattern; if they run at night, ask for the penalty excess reducer (it is on the proposal form, section 7). Same question as Tshenolo and Cordiguard.

Also: capsizing whilst tipping adds **5% of the vehicle's value**, only relevant if any truck tips.

WORDING	WORTH KNOWING, VAPS HCV TRANSPORTER 2026
3.1	The client may instruct repairs up to R35,000 without VAPS's consent, if a detailed quote is sent at once.
3.1.1	Retail value is the TransUnion dealers' guide value for the month of the loss, unless agreed value is on the schedule.
Tracking	Six conditions, all of which the insured must prove: fitted before the loss, working, paid up, contract in place, 24-hour manned monitoring, supplier obliged to recover.
Spillage	R250,000 for the vehicle's own fuel tank; dangerous goods (SABS 0228) excluded. Irrelevant unless they carry fuel.

THINGS THAT ARE FINE, SO YOU DO NOT WASTE TIME ON THEM

Sasria reconciles (cars and SUVs correctly on private M1, bus M5, special types M6, heavy M8). Territory includes Zambia as well as the usual seven. Unauthorised passenger and contingent liability R2.5m each are included. Towing R100,000, wreckage R50,000, keys R50,000 are standard VAPS. Description of use clause 3.28 excludes **hiring the vehicles out**, so check they do not.

The Naked Truth

Where this pack is weak. **Raise them first** and you look like the expert.

1 ▶ "So is it cheaper or not?"

We do not know. No schedule, no debit order amount, no insurer name.

SAY "Ek gaan nie vir julle 'n besparing belowe wat ek nie kan bewys nie. Gee my die skedule, dan wys ek lyn vir lyn."

2 ▶ The price is not firm

"Subject to 3 years written claims". If the written record is worse than R3.84m, or the period is shorter, the rate moves.

SAY "Die prys is op julle claims history gebaseer. Sodra ons die geskrewe history het, bevestig ek die finale syfer."

3 ▶ Adding cover adds cost

GIT, reducers, R5m third party and passenger liability all go on top of R219,942.

SAY "Die quote is goedkoper as wat dit gaan wees, want dit los julle loads uit. Ek wil hê julle moet die regte syfer sien."

4 ▶ No vehicle list on the schedule

A fleet insured as nine totals is easy to argue about at claim stage.

SAY "Elke voertuig moet met sy waarde op die skedule wees. Dis julle beskerming as daar 'n eis is."

5 ▶ Tracking cost lands on them

Up to about 112 units, plus video telematics. They may see it as a cost of moving.

SAY "Die vereiste geld vir enige versekeraar met julle diefstal history. Dis nie ekstra nie, dis wat julle eis laat betaal."

6 ▶ "Transport Contractor"

The quote misdescribes them. If we had not caught it, a claim could have been challenged.

SAY "Ons het dit self gevang en laat regmaak. Dis presies hoekom julle 'n broker wil hê wat die skedule lees."

7 ▶ "Who is Renasa?"

VAPS is the underwriting manager; Renasa (Telesure group, FSP 15491) carries the risk. Clients sometimes only know the big names.

SAY "VAPS hanteer die polis en die eise, Renasa dra die risiko. Albei is gelisensieer en Renasa is deel van die Telesure groep."

8 ▶ 19 SUVs on a business policy

R11.6m of SUVs rated at the same 3.75% as the trucks. If they are directors' cars, a private policy may be cheaper.

SAY "Wie ry die SUVs? As dit die direkteure s'n is, kyk ek of 'n private polis hulle beter pas."

BEFORE YOU PRESENT

Have in hand: the current schedule or at least the debit order and insurer, where GIT sits today, the claims dates, and what tracking is fitted. **Do not present R219,941.79 as a saving.**

BOTTOM LINE

This is a **review sale, not a price sale**. We found the missing load cover, the missing agreed values, the wrong business description and a theft record that makes tracking a condition. That is worth more to them than a number we cannot yet prove.

Your moves, in order

1 Get the current schedule

Or at minimum the insurer, policy number and monthly debit. A letter of authority to the current broker if needed.

2 Find the GIT

Where are the loads insured, what is a full load worth, refrigerated or not.

3 Claims dates

The R3.84m: which years? Then the written 3-year history from the current insurer.

4 Tracking audit

What is fitted on the 42 trucks, 32 trailers and 19 SUVs, by whom, monitored or not.

5 One e-mail to VAPS

Below. Send it through FSP (Tanya Kapp, ref 49275144).

THE E-MAIL TO VAPS, READY TO SEND

Re VAPS54248, Impact Distributors (ref 49275144). Please (1) quote **Goods in Transit** with deterioration of stock for refrigeration breakdown; I will confirm commodities and load limit; (2) quote the **own damage, theft/hijack and third party excess reducers** on all groups; (3) quote **increased third party to R5,000,000** including fire and explosion; (4) quote **passenger liability** on the bus; (5) note **agreed value** per vehicle from the attached fleet list; (6) correct the name to Impact Distributors (Pty) Ltd and the business description to food producer and distributor; (7) confirm in writing that the "vehicles in the open not under carports or hail nets: not covered" line on page 18 does not apply to the Motor Fleet section; (8) reset inception and correct the windscreen description. Thank you.

"Ons broker het ons nog altyd goed gehelp."

- ✓ "Dis goed. Wys my die skedule, dan kyk ons saam. As alles reg is, sê ek so. Maar as julle loads nie verseker is nie, of julle trackers nie die vereistes haal nie, wil julle dit nou weet, nie na 'n hijacking nie."

"Ons GIT is klaar elders verseker."

- ✓ "Perfek, stuur vir my daai skedule ook. Dan kyk ek of die load limit en die tracking vereistes saam met die nuwe vloot polis werk, sodat daar nie 'n gaping tussen die twee is nie."

- ☐ Current schedule or debit order
- ☐ Claims dates and written history
- ☐ Tracking audit, 93 to 112 units
- ☐ What the 18 special types are

- ☐ Where GIT sits today
- ☐ Fleet list with agreed values (to VAPS)
- ☐ Night shifts? 23h00 to 04h00
- ☐ Quote valid to about 6 Nov 2026
