

RM PLAYBOOK · TSHENOLO WASTE · 21 SEPTEMBER 2026

The Schedule Landed. Read This First.

Current is **Hollard R545,848.95**. Your two figures were right. But the headline saving is softer than it looks, four of my own findings from the first pack were measured against the wrong baseline, and there is a live uninsured exposure on the policy they hold today.

ALPHA, AS QUOTED

-R122,541

you said R122,000

ALPHA, LIKE FOR LIKE

warranty breach, today

IN THIS PLAYBOOK

● 01 Where we stand

● 02 The tracking breach

● 03 The soft saving

● 04 My corrections

● 05 Liability

● 06 Your moves

Ungated. Your numbers were right.

175 pages, text layer, reconciles to the cent. **One policy, not two**, which finally settles what you meant by "twee polisse wat opgesplit is": that was the Natsure proposal, split into a fleet quote and a commercial quote.

ALL-IN MONTHLY	CURRENT	NATSURE	ALPHA
Insurance sections	456,980.26	433,408.09	400,876.72
Policy fees	10,050.00	0.00	0.00
Sasria	23,702.88	25,287.22	22,431.67
Value added products	55,115.81	3,160.00	0.00
Total	545,848.95	461,855.31	423,308.39
Saving against current	-	-83,993.64	-122,540.56

TELL THE CLIENT THIS, IN THIS ORDER

Not the R122,541. Lead with the tracking breach, then the missing liability, then the money. **If you lead with the money you will bind a cheaper policy that still has no public liability and still has no theft cover on 49 vehicles.**

THE POLICY

INSURER	BROKER
Hollard (Binder), FSP 17698	NuWest Insurance Brokers, FSP 17094
POLICY	ON RISK SINCE
NBUS2-0213978	1 August 2024
REVIEW DATE	
1 July 2027	

7 OF 24 SECTIONS TAKEN

Motor specified	348,707.72
79,394,630	
Business all risks	91,432.06
13,209,515	
Electronic equipment	8,300.68
1,886,443	
Fire	4,052.28
15,695,466	
Theft	2,466.66
370,000 first loss	
Office contents	1,785.87
1,932,963	
Accidental damage	234.99
150,000	

WHAT THE INCUMBENT EARNS

Commission **R67,975.33 a month, R815,704 a year**, of which R11,123.83 comes off the value added products. Expect a counter-offer the moment they hear we are quoting. **The tracking breach and the missing liability are the two things a price cut cannot answer.**

THE 17 THEY DO NOT HAVE

- Public / broadform liability
- Employers' liability
- Umbrella liability
- Business interruption
- Goods in transit
- Fidelity
- Money
- Glass
- Accounts receivable
- Machinery breakdown
- Directors' and officers'
- Cyber
- Group personal accident
- Buildings combined
- Motor traders
- Solar power
- Sasria policy extensions

They have no theft cover on R58.3m of fleet

ON THE POLICY THEY ARE PAYING FOR RIGHT NOW

Tracking Devices Warranty (value over R500,000): theft and hijack cover is "*precedent to the liability of the Company*" on an early warning tracking and recovery system being fitted, linked, operational, armed and paid for. Plus MOT_019 (one device), MOT_020 (two devices) and MOT_004 (approved security device).

WHAT THE SCHEDULE RECORDS	COUNT	EXPOSURE
"Required", no device installed 32 plain, 18 early warning system	50	–
Devices actually named Beame, C Track, Bidtrack. All competitors.	3	–
Alarm system fitted	0	–
Above the R500,000 threshold 45 heavy, 2 trailers, 2 buses	49	58,257,591

THE PLAY, AND IT IS THE BEST ONE IN THIS FILE

This is a **70-unit lead across R79.4m** and **we are not on a single vehicle**. You are not selling them tracking, you are telling them their theft cover is conditional on something their own schedule says is missing. **Say it exactly that way**. It also explains why Natsure's nil-excess clause names Ctrack: they already run one unit, so somebody has been in there before us.

CLASS	UNITS	SUM INSURED	TRACKING FIELD
Commercial heavy avg R1,180,722 each	45	53,132,476	Required, not installed
Private and luxury 11 over R350,000	15	18,219,979	Required, not installed
Trailers tridem axle R2,689,098	2	3,386,929	No field at all
LDV	6	2,917,060	Mixed
Buses	2	1,738,186	Required, not installed
Fleet	70	79,394,630	

THE EXCESS ARGUMENT, IN RANDS

Natsure gives a **nil theft excess** where an approved tracking and recovery unit is operational, against **10% of the vehicle's value** where it is not. Dearest truck R2,012,670 is **R201,267 a claim**. Dearest trailer R2,689,098 is **R268,910**. Get Cartrack written into that clause in **both** places, HCV and trailers.

DO NOT MISS THE TRAILERS

Neither trailer carries a tracking field **at all**, and the tridem axle unit at **R2,689,098** is the single most valuable item on the register and the one most likely to spill. On a medical waste operation that is the unit to lead the telematics conversation with.

R55,115.81 a month of it is not insurance

The current total includes an **additional services** block that neither quotation replaces. It reconciles exactly. If you compare R545,849 to R423,308 you are comparing a programme with car hire, roadside and credit shortfall against one without.

VALUE ADDED PRODUCT	PROVIDER	R/MO
Car hire, 45 or 60 days	Empire Insurance Administrators	30,989.00
HCV roadside assistance	Key Alliance Group	10,989.63
Commercial motor fleet fee	ASI Blue	5,037.50
Credit shortfall (i-Credit) "No" on all 70 at BOTH insurers	Infinite Credit UM	4,328.69
Scratchesure	Empire Insurance Administrators	1,785.00
Car hire, 30 days	Empire Insurance Administrators	1,342.00
Commercial assistance	Key Alliance Group	643.99
Total, R661,390 a year		55,115.81

USE THESE TWO NUMBERS

thin, and that matters in play 06

IN THE ROOM

"Voordat ons oor die prys praat, moet u weet dat omtrent R55,000 van wat u vandag betaal nie dekking is nie. Dit is car hire, sleepdiens en credit shortfall. Nie een van die twee quotes sluit dit in nie, so ek laat dit eers prys voordat ek vir u 'n finale syfer gee."

WHAT REPLACES IT	CURRENT	NATSURE	ALPHA
Car hire	32,331.00	2,290.00	Not taken
Roadside and assists	11,633.62	870.00	In the rate
Credit shortfall	4,328.69	No, all 70	No, all 70
Towing and wreckage	In roadside	25,000 / 50,000	15,000 / 15,000

Four corrections, before you repeat them

Everything below was written before the schedule arrived. **Do not use the earlier pack.** These are the four points that move.

POINT	WHAT THE OLD PACK SAID	WHAT THE SCHEDULE SHOWS
Alpha's third party	"Halved, R5m to R2.5m. A regression."	Current is R2,500,000 on all 70. Alpha matches. Natsure's R5m is the upgrade.
Dangerous goods and clean-up	"Alpha has declined it on all 45 trucks."	True, but the current policy has none either. Natsure is adding cover, Alpha is matching.
The bicycles and the air conditioner	"Are they the client's? Are they on the current policy?"	Yes. 32 bicycles R6,357,177 at R37,083.54/mo and one air conditioner R2,298,999 at 9.9% a year.
The R4,580,901 value dispute	"Resolve against a real asset register."	The register exists and Natsure is right. Alpha is short R4,953,201 against it.

THE ONE THAT ACTUALLY HELPS US

The bicycles and the air conditioner are not padding, they are on the book. And **Alpha re-rates exactly those two lines**, bicycles 7.00% to 6.00% and the air conditioner 8.50% to 5.20%. That is **R14,234 a month, R170,800 a year**, on two line items. It is a clean, checkable reason Alpha is cheaper, and it is a fair thing to put to the incumbent as a re-rate request.

THE FLEET, SETTLED

Register	79,394,630
Natsure short only on the cars	79,022,330
Alpha short R3.9m on the trucks alone	74,441,429

Alpha settles a heavy total loss at about **92.7c in the rand** unless corrected.

AND ONE ON THEIR OWN SCHEDULE

The index page prints motor sum insured **R61,354,333**; the register four pages later totals **R79,394,630. R18,040,297 apart on Hollard's own document**, and the register is what the premium is built on. Put it to NuWest in writing. It is the kind of thing an insurer leans on at claim stage.

WHAT DID NOT CHANGE, SO YOU CAN STILL USE IT

The nine Natsure findings and the six Alpha findings from the first pack stand except where corrected above. Still true: **no public liability on either quote, 63 of 70 tracking required with device unknown, credit shortfall "No" on all 70, Sasria mis-declared on both, the two quotes incept a month apart, the Ctrack clause, Natsure's third party is an aggregate that reads like R7.5m and is R5m, and fare-paying passenger liability is missing on both midibuses.** The schedule has now confirmed that the last one is a standing gap rather than something either insurer removed.

No public liability. Not on any of the three.

STRAIGHT OFF THE INDEX OF COVER

Combined Liability (claims-made): NO. Umbrella Liability: NO. Employer's Liability: NO. Only 7 of 24 sections are taken. The only liability cover anywhere in the programme is the motor third party limit of R2,500,000.

On a business that puts sharps containers into hospitals and clinics, collects and transports biohazardous waste, and runs hazardous waste training on other people's premises. **Since at least 1 August 2024.**

WHY THIS IS THE SALE

It is not a criticism of Natsure or Alpha, and it is not something the incumbent can fix with a discount. It is the single most serious thing in the file and we are the ones who found it. **A broker who reads 175 pages and finds the hole is worth changing broker for.** That is the whole pitch.

ALSO MISSING ON ALL THREE

- Business interruption
- Goods in transit
- Fidelity, money, glass
- Machinery breakdown on R12.8m of plant
- Deterioration of stock
- **Fare-paying passenger liability** on both midibuses

WHAT I HAVE ASKED BOTH MARKETS FOR

Public liability, products liability and employers' liability, priced as an addition, plus a separate spill solution. **Expect the programme to come back dearer than R423,308 and be ready to defend that.** A cheaper policy that still has no public liability is not a win, and if it goes wrong it is our Record of Advice that gets read.

CAREFUL WITH THE CLEAN-UP LINE

Natsure's R250,000 a vehicle is a **motor extension**, not environmental impairment liability under NEMA. It is on the 45 trucks only, **nothing on the two trailers**, and the trailer is where the product sits. Same route as Bakers: get EnviroSure to price a transport spill plan so the client can see the real number.

WARRANTIES THAT VOID COVER TODAY

- Firefighting equipment serviced annually, records kept
- Gas installations to SANS 100087-1
- Hot work permit, **cover suspended from the moment of breach**
- Computer equipment excluded from fire
- Micro-organism exclusion, absolute

THE EXCESS CROSSOVER, MEMORISE THIS

Natsure is **4.5% of the vehicle's value** min R5,000, so about **R53,132 on the average truck whatever the claim**. Alpha is **10% of the claim** min R5,000. **They cross at about R450,000.** Below that Alpha is far better, above it Natsure is. Ask what their typical claim looks like.

Your moves, in order

- 1 **Get the claims record from NuWest**
The schedule carries no loss history, only "no claim bonus: 0" per vehicle. Both quotes are conditional on three years' experience in writing, so **neither price is firm**. Do not present a final number until this lands.
- 2 **Tracking survey on all 70**
Confirm what is fitted against the 50 that read "Required". Three competitor units are on the book. This is the 70-unit lead and it is also the service finding.
- 3 **Both markets to price liability**
Public, products and employers'. Plus car hire, roadside and credit shortfall so the comparison is like for like.
- 4 **Alpha to re-rate to R79,394,630**
And correct the X5 and M135i model years against the schedule.
- 5 **Ask the client what shifts they run**
Natsure loads the excess 5% for driving between 23h00 and 04h00 and another 5% for a single-vehicle accident, cumulative. Alpha has no loadings. Healthcare waste often moves before dawn. **This one question can decide the recommendation.**
- 6 **Align the inception dates**
Natsure's fleet quote incepts 1 October and its commercial quote 1 November. A month apart is a month of half-moved cover.

BOTTOM LINE FOR YOU

Alpha is the better price, Natsure is the better policy, and neither is ready to bind. Alpha is R38,547 a month cheaper but is short R4.95m on values, gives no clean-up and matches rather than improves the third party limit. Natsure copies the book correctly, doubles third party and adds clean-up, but is only R28,878 better like for like. **Once liability is priced the gap will narrow and my expectation is that Natsure wins on cover.** The tracking point goes to the client this week regardless of who writes the risk.

"Maar NuWest se prys is nou laer, hulle het gematch."

"Prys was nooit die probleem nie. Hulle het vir twee jaar geen public liability op die polis gehad nie, en 49 voertuie het nie theft cover nie omdat hulle eie skedule se tracking is 'required' en nie installed nie. 'n Korting los nie een van daardie twee op nie."

"Die bicycles en die aircon, hoekom is dit op 'n waste polis?"

"Dit is klaar op julle huidige polis, R55,982 per maand. Ek vra nie hoekom nie, ek vra of julle nie te veel daarvoor betaal nie. Alpha rate dit af met R14,234 per maand."
