

TSHENOLO WASTE · INTERNAL · 21 SEPTEMBER 2026

Tshenolo Playbook

For Cules Van Dyk. All three of your quotes are in and both savings figures are untestable, because nobody has sent the current schedule. Alpha is R38,547 cheaper and it is the one with no pollution cover at all on a hazardous waste fleet.

GET THIS FIRST

Current schedule

three quotes in, no benchmark

ON 45 TRUCKS

No hazmat liability

Alpha offers it and declined it

ALPHA V NATSURE

R38,547

a month, about R462,563 a year

Three quotes, zero benchmark. Neither saving figure can be tested.

DOCUMENT	SENT	COVERS	MONTHLY
Natsure / Compass HCVU192176 33pp, quoted by Olga Van Der Merwe, eff 01/10/2026	16 Sept	55 vehicles	R311,086.71
Natsure / Compass COM192164 119pp, Thuli Sibiya, eff 01/11/2026	16 Sept	6 premises + 15 cars	R150,768.60
Alpha / Guardrisk ALPHACOM205554 190pp, eff 01/10/2026	19 Sept	the whole account	R423,308.39
The current policy	never	unknown	unknown

YOUR TWO SAVING FIGURES AGREE WITH EACH OTHER, WHICH IS USEFUL BUT NOT PROOF

You said **R77,000** against Natsure and **R122,000** against Alpha.
 $R461,855 + R77,000 = \mathbf{R538,855}$. $R423,308 + R122,000 = \mathbf{R545,308}$.

Two independent numbers landing R6,453 apart put the current programme near R540,000 a month. That is a good cross-check and it is still an inference. **Do not put either saving on a client page until the schedule is in hand.**

▲ A WORDING CORRECTION WORTH KNOWING

"Dit is twee polisse wat opgesplit is" describes the two files you attached, which is the **Natsure proposal split into a fleet policy and a commercial policy**. Read the other way round it sends us hunting for two current policies that may not exist. Your Natsure side is complete. **What is missing is the other side of the comparison.**

STRUCTURE AND ADMIN	NATSURE / COMPASS	ALPHA / GUARDRISK
UMA and insurer	Natsure FSP 50704 / Compass FSP 12148	Alpha FSP 21820 / Guardrisk FSP 75
Inception	01/10 and 01/11, a month apart	01/10/2026
Territories	twelve	eight
Reg and VAT number	blank on both	"Required"
Turnover, wages, employees	not declared	all blank
Our commission	$R64,860.27/\text{mo} = R778,323/\text{yr}$	$R58,383.08/\text{mo} = R700,597/\text{yr}$

ASK THE CLIENT FOR EXACTLY THIS

1. The current policy schedule or schedules, whoever writes them.
2. Whether a **separate liability policy** exists, and where. See Play 03.
3. The **vehicle asset register**, because the two quotes are R4,580,901 apart.
4. The **3-year claims record**, which both insurers require before the price is firm. Natsure: *"subject to receipt for three (3) years detailed loss history, confirmed by current or previous insurer"*.

Alpha prices dangerous goods liability on its own schedule and has taken none of it

ON EVERY ONE OF THE 45 HEAVY COMMERCIAL ITEMS

Clean up costs (Leakage from vehicle) | **No** | 10% of claim minimum R1,500

Spillage and clean-up costs: Substance transported | **No**

Liability arising out of the carriage of dangerous goods | **No** | Forms part of spillage clean up costs excess on total claim

Spillage and clean-up costs: Riot and strike | **No**

Tool of trade liability | **No** | R5,000

Business description on the same schedule: **"collection and transportation of waste, and general and hazardous waste management training"**.

POLLUTION COVER	NATSURE	ALPHA	ON
Clean-up costs	R250,000 each	nil	45 trucks
Dangerous goods liability	not offered	declined	45 trucks
Trailers incl. a G.R.P tridem axle unit at R2,689,098	nil	nil	2
What Natsure's R11,250,000 costs	R2,250.00/mo	not quoted	R600/yr per truck

△ THE TRAILER IS THE POINT, NOT THE TRUCK

Alpha's schedule is the first document that tells us what the trailers are: a **7.2m single skeletal drawbar trailer R697,831** and a **G.R.P 15,500mm tridem axle trailer R2,689,098**, registration "Required". **Glass reinforced plastic on a tridem axle is a liquid body**. Same lesson as Bakers Tankers: on a fleet like this the substance is in the trailer, and the clean-up line is written against the truck.

THE SAME SUBJECT COMES BACK AT THE PREMISES, AND IT IS A WARRANTY NOT A SUGGESTION

Natsure's commercial policy conditions cover on **storage of hazardous and flammable substances per OHS Act Regulation 4 and SANS 02363**, waste **bagged daily and removed weekly**, a **SAIDSA alarm linked to armed response with the arming log available**, an **electrical compliance certificate**, fire **equipment serviced annually**, **SABS Class I lightning arrestor and Class II surge arrestor**, and **stock raised 150mm on approved pallets**.

Walk these with the client before inception. On a hazardous waste site a breached warranty is the cleanest route an insurer has to decline, and the client will assume nobody reads them. Same shape as the CS Continental surge-protection find, where the schedule declared a breach of its own condition.

HOW TO PLAY IT

Do not accuse anyone. Say: **"Alpha lists dangerous goods liability as an option on your own schedule and it is switched off. What does it cost?"** At R600 a year per truck for R250,000 at Natsure, the answer will be small. **If Alpha prices it and stays under Natsure, Alpha wins the account. If Alpha refuses, we recommend Natsure even though it is R38,547 dearer.** Get it in writing from Alpha.

Three quotes, R423k to R462k a month, and not one has public liability

PRINTED ON THE ALPHA COVER SUMMARY

"Broadform liability: Not included." Directors and officers: not included. Commercial umbrella: not included.

Both Natsure quotes are the same. No public liability, no products liability, no employers' liability. The only liability on any of the three documents is motor third party.

△ WHAT THIS CLIENT ACTUALLY DOES

Supplies **speci-bins, biohazardous tape and cable ties** into hospitals and clinics. **Handles biohazardous material on other people's premises.** Runs **hazardous waste management training.** Six premises.

A sharps container failing in a ward. A needlestick during a collection. Contaminated waste in the wrong stream. Bad advice in a training session. **None of it is a motor claim.**

IT IS ONE OF TWO THINGS AND THE CLIENT DECIDES WHICH

If a separate liability policy exists, then both proposals as quoted would leave it behind, and it has to be replaced or deliberately kept. Find out who writes it and get the schedule.

If it does not exist, this is the single most valuable thing we can put in front of this client, and it is worth more than the R38,547 that separates the quotes. **That is the conversation that wins the account, not the price.**

LIABILITY, WHAT IS ACTUALLY ON THE TABLE	NATSURE HCV	NATSURE CARS	ALPHA, ALL
Third party	R5,000,000	R2,500,000	R2,500,000
Passenger liability	R2,500,000	R2,500,000	R2,500,000
Fire and explosion	R5,000,000	n/a	not stated
Public liability	none	none	none
Natsure's catch	the three above are an AGGREGATE of R5,000,000, not layers		reads like R7.5m, is R5m

△ READ NATSURE'S SUB-SECTION B IN FULL BEFORE YOU QUOTE R5,000,000 AT ANYONE

(a) Passenger liability R2 500 000 · (b) fire and explosion R5 000 000 · (c) **any other event and the aggregate of (a), (b) and (c) R5 000 000**

So Natsure's advantage over Alpha on third party is real but narrower than 2:1. **Ask both for R5,000,000 clean, not aggregated.**

ALSO MISSING FROM BOTH, AND WORTH QUOTING

Business interruption (six premises and a processing plant) · **machinery breakdown** on R12,839,148 of plant at Denver · **fidelity** · **goods in transit** · **money** · **glass** · **deterioration of stock** · **accounts receivable** · **group personal accident.** **Buildings carry no sum insured on either,** which is consistent with leasing, but confirm it against the leases.

Alpha is R38,547 cheaper, and the excess crossover is R450,000

SECTION	NATSURE	ALPHA	DIFFERENCE
Motor, all classes	R336,312.84	R322,932.01	-R13,380.83
Property and all risks	R100,255.25	R77,944.71	-R22,310.54
Sasria	R25,287.22	R22,431.67	-R2,855.55
All in	R461,855.31	R423,308.39	-R38,546.92

WHERE THE R22,310 OF PROPERTY SAVING COMES FROM, AND A CAUTION

Business all risks R87,773.88 at Natsure v R60,240.03 at Alpha. The 30 Trek bicycles are on **both** quotes: R6,405,927 at **7.00%** v R5,976,425 at **6.00%**. The R2,298,999 of air conditioning is **R16,284.58 at 8.50%** v **R9,962.33 at 5.20%**, which is about R6,300 a month of the gap on its own.

⚠️ **But Alpha carries 10 fewer items and R1,578,149 less sum insured.** Reconcile the two item lists before crediting the whole saving. And the bicycle question does not go away because a second insurer also quoted them: **are they the client's, and are they on the current policy?**

EXCESS, HEAVY VEHICLES	NATSURE	ALPHA
Basic	4.5% of VEHICLE VALUE min R5,000	10% of CLAIM min R5,000
Single vehicle incident	+5% of claim	none
23h00 to 04h00	+5% of claim	none
Theft or hijack	20% of value, 10% with a device, nil with a Ctrack device	15% of claim min R3,000
Towing and wreckage	R25,000 and R50,000, plus Truck Assist	R15,000 and R15,000

TWO OTHER PLACES ALPHA IS QUIETLY THINNER

Towing and wreckage: Alpha R15,000 in and outside RSA and R15,000 wreckage removal, against Natsure R25,000 and R50,000, plus Natsure's optional non-accident towing of R900,000 across the 45 trucks and its Truck Assist benefit. Alpha's recovery-costs-no-damage line reads No.

Sasria: R22,431.67 at Alpha against R25,287.22 at Natsure, and part of that gap is the **two buses Natsure has not declared at all**. So Alpha's Sasria is not simply cheaper, it is differently declared. Check it against the corrected Natsure figure, not the quoted one.

△ SAY THE EXCESS IN NUMBERS, NOT ADJECTIVES

Natsure's basic is a percentage **of the truck**: on the average unit that is roughly **R45,000 on every claim, including a windscreen-sized one**. Alpha's is a percentage **of the claim**.

🎯 **Crossover about R450,000. Below it Alpha is dramatically better, above it Natsure is.** Most fleet claims sit well below R450,000, so this favours Alpha, but say both halves.

✅ **And the night-shift question disappears at Alpha.** I asked you what shifts they run because Natsure loads 23h00 to 04h00 by 5%. Alpha charges nothing. Still worth knowing, but it no longer decides anything if Alpha wins.

The two quotes are R4,580,901 apart on the same vehicles

CLASS	UNITS	NATSURE SI	ALPHA SI	DIFFERENCE
Heavy commercial	45	R53,132,476	R49,232,600	–R3,899,876
Private type	15	R17,847,679	R17,447,259	–R400,420
Light commercial	6	R2,917,060	R2,636,455	–R280,605
Buses and trailers	4	R5,125,115	R5,125,115	exact
Total	70	R79,022,330	R74,441,429	–R4,580,901

△ TWO CARS CARRY DIFFERENT MODEL YEARS ON THE TWO QUOTES

MY01SHGP BMW X5: Natsure 2026 at R2,526,800, Alpha **2023** at R1,878,600.

BMW M135i, no registration: Natsure 2025 at R1,225,671, Alpha **2024** at R860,271.

JR29FVGP AMG G63: R2,761,100 v **R3,366,480**, R605,380 apart.

One list is stale. **Get the asset register. Do not settle it by taking the higher figure**, because an over-declared vehicle wastes premium and an under-declared one settles under average.

✅ ALPHA HAS GIVEN US THE FLEET LIST NATSURE NEVER DID, AND IT CLOSES A GATE

Natsure's HCV quote had **no per-vehicle schedule at all**. Alpha's has all 45: almost entirely **Isuzu FTR 850 AMT and FRR 600**, one NPR 400, one 2019 Fuso, and one **2025 Volvo FH 520 6x4 truck-tractor at R2,617,300 with registration "Required"**.

By year: 2019 ×2, 2020 ×9, 2021 ×1, 2022 ×7, 2023 ×6, 2024 ×12, 2025 ×8.

🚫 **Nothing is older than 2019, so Natsure's condition requiring inspection or valuation certificates for every vehicle ten years and older applies to ZERO vehicles.** That gate is closed. Plates span GP, ZN and NU, so the fleet sits across the six premises, not at Lanseria.

THE FLEET, AND WHERE IT SITS

45 trucks: **2019 ×2, 2020 ×9, 2021 ×1, 2022 ×7, 2023 ×6, 2024 ×12, 2025 ×8**. Values run from R418,700 on the 2019 Fuso to **R2,617,300 on the 2025 Volvo FH 520**, which is the only truck-tractor on the fleet and the only one with no registration number.

Six premises: **Lanseria head office, Denver Johannesburg (the plant, R12,839,148 of machinery), Kimberley, Maitland Cape Town and Mafikeng**. Registration plates run GP, ZN and NU, which matches. ⚠️ **Maitland and Mafikeng carry theft cover of R20,000 and nothing else at all** on the Natsure commercial quote. Ask what is actually at those two sites.

🔗 THE LEAD: 70 UNITS, AND IT IS A CONDITION OF COVER ON BOTH

Alpha: 63 of 70 read "Tracking and recovery system required: Yes" with "Approved tracking device: Unknown", and the secondary device reads "No tracking device".

Natsure: all 15 cars read "Tracking device installed: No", and 11 of them are over R350,000, where its wording says theft cover does not INCEPT until a device is fitted. On the fleet quote, nothing over R500,000 has theft cover without one.

📄 **And on Natsure only, the nil-excess theft benefit names Ctrack.** Any other approved device is 10% of vehicle value. On the dearest truck that is about R201,000 a claim. **Cartrack is the broker on that quote. Get Cartrack written into the clause, in both the HCV and the trailer excess tables.** Alpha names no brand at all.

The recommendation, and what to get in writing

THE RECOMMENDATION

Alpha, conditional on it pricing what it has left out. R38,547 a month cheaper, a far kinder excess on ordinary claims, no night or single-vehicle loadings, and the only full vehicle schedule on the file.

If Alpha will not price dangerous goods liability and clean-up, recommend Natsure and say why. We do not put a hazardous waste fleet on the cheaper programme when the cheaper programme is the one with no pollution cover at all.

GET IN WRITING

Alpha: price **dangerous goods liability, spillage and clean-up on the trucks AND the trailers, tool of trade liability, and third party at R5,000,000.** Supply the **included entities list**, because the schedule says "refer to page 2" and page 2 is the cover summary. Fill in registration, VAT, declared turnover, wages and employee numbers, all currently blank.

Natsure (Olga Van Der Merwe and Thuli Sibiyi): declare the two buses to Sasria, a R1,738,186 gap. Add Cartrack to the nil-excess tracking clause in both excess tables. Lift **clean-up above R250,000** and extend it past the trucks. Confirm whether the R5,000,000 third party is truly an aggregate of passenger, fire and all other events. Correct the **15 private cars declared as "Goods Vehicles M2"** on Sasria, R372,300 out. And align the two inception dates, currently **01/10/2026 and 01/11/2026, a month apart.**

Both: confirm the price was rated on the three-year claims record, not merely conditional on receiving it.

△ CONDITIONS THAT COULD STILL MOVE EITHER PRICE

Natsure: three years of loss history confirmed by the current insurer, a signed proposal and debit order, and *"should the risk already be insured with Natsure HCV and Commercial this quotation will be null and void"*, so **check which underwriter the current policy sits behind.** Alpha: declared turnover and wages are blank, so anything rated on them will move. **Both quotes are monthly policies and both are subject to confirmed claims experience.**

✓ TWO THINGS THAT ARE ALREADY IN YOUR FAVOUR ON THIS ACCOUNT

1. The client already buys tracking of a kind. Natsure's electronic equipment schedule lists **"Team Track Bin Tracking and Management"** at R35,000. They understand the category, which makes the vehicle conversation easier, and it is a competitor sitting on the account.

2. Natsure will fund a device itself, on its own terms: the insurer pays for the basic unit and standard RSA fees, **owns the unit**, suspends the service if the premium defaults, and **receives all the tracking data.** That is a competing offer written inside the policy wording. Know it is there before the client reads it to you.

AND THE ONE THAT COSTS NOTHING TO FIX

Fare-paying passenger liability is declined on both buses by both insurers. The buses are a 2020 and a 2021 Iveco 50C15 Sisonke midibus at R869,093 each. If they carry Tshenolo staff that is correct and we leave it. **If they ever carry anyone else for a fee, it is a hole.** One question to the client settles it. Same shape as Wes-Kaap Busdiens and Gateway School.
