FLEET & GIT REVIEW · RM FIELD EDITION

Idol Transport Playbook

Five markets, 47 units, reconciled to the cent. The recommendation, the three gates that stand in front of it, and the 43-unit lead sitting in the schedule.

RECOMMENDED SAVING

R14,656/mo

OWNsurance · ≈ R175,878/yr

LOSS RATIO, 24 MONTHS

≈96%

R2,402,455 paid on R2,491,002

THE REAL PRIZE

43 units

+ 14 dual-camera telematics

The game plan

This one is not won on price. Four of the five markets are within R17,000 a month of each other — the spread is in the **third-party limit, the basis of settlement and how far the goods cover reaches**. Two quotes cover goods in South Africa only. One costs more than the incumbent and halves the liability. Know which is which before you sit down.

WHAT'S IN THIS PACK

1 Current teardown

RM

Transport-ONE section by section, and the two conditions nobody has met.

2 The scoreboard

RM + CLIENT

All five markets, all-in monthly, with the cover lines that decide it.

3 OWNsurance teardown

RM

The recommendation, and the fund maths that reconciles to the rand.

4 Why three are benched

RM

MiWay, King Price and Natsure — the exact line each one fails on.

5 The tracking gap

RM + CLIENT

43 units, 14 dual-camera. The commercial reason this file matters.

6 Naked Truth + Battlecard

RM ONLY

Where you are weak, and the words that answer it.

HOW TO RUN THE MEETING

1

Open with the tracking condition, not the price. Their schedule says theft cover needs a monitored device on 20 vehicles and every item reads "Tracking device required: No". That is a live hole and it earns you the room.

2

Walk the scoreboard. Let them see that the two cheapest-looking quotes cover goods in South Africa only — before they ask why you didn't lead with the cheapest.

3

Land OWNsurance on cover, then price. R10m third party held, agreed value held, no excess. The R14,656 comes last.

4

Say the fund out loud yourself. "Annual savings R341,670" is their own money, not a saving. If they discover that after you present, you lose the file.

▲ BEFORE YOU PRESENT

Do not put a figure in front of this client until OWNsurance confirms in writing that it rated on the actual claims record. 58 losses and R2,651,053 in three years. The quote says "subject to a satisfactory claims history" on line one. A price that moves after presentation costs you the relationship, not just the deal.

Transport-ONE, section by section

One Underwriting Managers t/a ONE · underwritten by Old Mutual Alternative Risk Transfer Insure (FSP 49551) · policy HCV/1240900 schedule 6 · broker of record Cci Global (Pty) Ltd · inception 01/05/2026, monthly, anniversary 01/04/2027

SECTION	SUM INSURED	PREMIUM / MO	WHAT IT ACTUALLY SAYS
MOTOR — AGREED VALUE, 47 UNITS			
Heavy commercial × 18	R17,462,400	R85,151.72	17 on agreed value; KD45LTGP on retail.
Trailers × 25	R8,989,747	R13,330.07	3 Henred at R970,000 each.
Light delivery × 4	R1,512,700	R5,309.94	Third party R2.5m on these, not R10m.
Motor — subtotal	R27,964,847	R103,791.73	Reconciles to the cent off the item schedule.
EVERYTHING ELSE			
Goods in transit × 18	R36,000,000	R28,800.00	R2,000,000 a vehicle at R1,600 each. Commodity: General Goods.
Public liability	R20,000,000	R3,729.60	37× general and tenants, excess R2,500. Fancourt Office Park address.
Personal accident	R25k–R100k	R507.61	~24 lives across options A/B/C.
Policy fee	—	R100.00	
Sasria	—	R11,442.00	M8 R10,498.53 + M2 R106.83 + GIT R836.64. Statutory.
All-in — per month		R148,370.94	incl. VAT R19,352.44, commission R20,896.06

 HOLE ONE • TRACKING

Endorsement **HCV0019** makes theft cover conditional on an approved, paid-up, 24h-monitored tracking and recovery device on every self-propelled vehicle over **R500,000 — 20 units. All 23 items read "Tracking device required: No"** and no supplier is named. A R581,842 theft was paid in Feb 2025. The next one need not be.

 HOLE TWO • CROSS-BORDER LIABILITY

The policy runs to **16 countries**, but every item records **Cross Border Liability Cover: No** and Riot & Strike outside RSA/Namibia: No. They are driving into Africa on a South African liability limit.

All-in monthly, reconciled to the cent

CURRENT • TRANSPORT-ONE

Natsure v1 21 Jul — superseded	R199,504.29	+R51,133.35	R5,000,000	RSA only	do not quote

▲ TWO NATSURE VERSIONS ARE IN CIRCULATION

The **21 July (Chantel Farelo) R199,504.29** carried R41,400/mo of GIT excess helpers and a higher HCV rate. The **22 July (Olga van der Merwe) R150,502.87** stripped the helpers and negotiated a flat R50,000 GIT excess matching the incumbent exactly. Only the 22 July version exists as far as the client is concerned.

💡 THE TELL

Trailers and light vehicles price **identically to the cent** on the VAPS and OWNSurance quotes — R11,237.18 and R2,521.17. Same rating engine behind both. If OWNSurance will not move on the loss-ratio confirmation, that is your lever with VAPS, and vice versa.

OWNsurance / Renasa, and the fund

SECTION	CURRENT	OWNSURANCE	Δ / MO
Trucks × 18 · R17,462,400 · agreed value	R85,151.72	R45,838.80	−R39,312.92
Trailers × 25 · R8,989,747	R13,330.07	R11,237.18	−R2,092.89
Light vehicles × 4 · R1,512,700	R5,309.94	R2,521.17	−R2,788.77
Goods in transit · R36,000,000	R28,800.00	R37,500.00	+R8,700.00
OwnRship Benefits A + Option A GIT the zero-excess benefit	—	R14,944.61	+R14,944.61
Side-tank clean-up R150,000 · 18 non-accident tows · risk management fee	—	R11,042.33	+R11,042.33
Public liability R20,000,000 · personal accident · policy fee	R4,337.21	not quoted	·
Sasria estimate on the OWN quote	R11,442.00	R10,630.34	−R811.66
All-in — per month	R148,370.94	R133,714.43	−R14,656.51

THE FUND — RECONCILES TO THE RAND, SO USE THESE WORDS EXACTLY

"Annual savings R341,670.46" = motor R59,597.15 × (1 − 9% binder) × (1 − 12.5% broker) × 60% × 12. "Annual savings GIT R163,800.00" = GIT R37,500.00 × (1 − 9% binder) × (1 − 20% broker) × 50% × 12. Commission is deducted **sequentially**, not added. Total into the client's own fund: **R505,470.46/yr = R42,122.54/mo**. Cartrack earns ≈20.375% of the motor premium and 27.2% of GIT.

EFFECTIVE ANNUAL COST

R1,099,103 → R1,604,573

No claims R1,099,103 · R250k of claims R1,349,103 · fund fully used R1,604,573. **Staying at ONE costs R1,780,451 in every one of those cases.**

▲ SELL THE EXCESS, NOT THE REBATE

R1.2m of losses a year against a R505,470 fund exhausts it in about **five months**. Option A carries **zero excess through depletion** — that is the product. Promise a surplus cheque and you will be explaining yourself at renewal.

Why the other three don't get presented

MiWay 123721659

R137,406.27

MIWAY INSURANCE LTD • FSP 33970 • 22-23 JUL 2026

RETAIL VALUE, NOT AGREED

17 of 18 trucks lose agreed value. GIT becomes a **single R2,000,000 load limit** instead of R2m a vehicle across R36m, the GIT excess **doubles to R100,000, driver dishonesty is excluded on GIT in both versions**, and neighbouring countries and extended territories are excluded on **both** the motor and the goods sections. Trailers cost R34,772.65 against R13,330.07 — nearly three times — and there is a **R13,289.44/mo broker fee** on top.

King Price / VAPS52493

R148,976.78

VAPS INSURANCE UNDERWRITERS • FSP 46264 • 23 JUL 2026

DEARER AND THINNER

+R605.84/mo, and third-party liability falls **R10m → R2.5m** (R1m if fire or explosion), public liability R20m → R10m, parking and moving third-party vehicles R5m → R1m, territory 16 → 8 countries. The capsizing-whilst-tipping loading becomes **5% of the value of the vehicle** — R72,695 on a R1.45m MAN — where ONE charges 5% of claim, and there are four tippers on this fleet.

Natsure HCVU191151

R150,502.87

COMPASS INSURANCE • 22 JUL 2026 (OLGA VAN DER MERWE)

GOODS: RSA ONLY

Dearest of the five, with GIT at R54,000 against R28,800 — up 87% — and **goods covered in the Republic of South Africa and nowhere else** while the motor section runs to 12 countries. Two errors to raise: the HCV sum insured is **R16,584,900 against R17,462,400** everywhere else, so KD45LTGP appears to carry no value; and the commodity is written as **"Groceries"** on a fleet of tankers and tippers.

CREDIT WHERE IT IS DUE

Natsure is the only quote carrying passenger liability — R2,500,000.

Broadform liability is also R10m **per address** rather than collectively, and the underwriter matched the incumbent's flat R50,000 GIT excess exactly. If the client turns out to have no cross-border book, Natsure is worth a second round on GIT territory and the SI correction.

DO NOT LET THE MIWAY QUOTE BE USED FOR ANYTHING

VAT number reads **4150284554**; Idol's is **4250264712**. Addressed to **@idolconsulting.co.za**, a different domain. Goods category **UNSPECIFIED**, container type **UNSPECIFIED**, *"Do you know the value of the loads? NO"*, and *"average number of trips per week: 1"* for an 18-truck long-haul fleet. Any one of those is a non-disclosure argument at claims stage.

43 units, and the reason this file exists

Every market imposes a tracking condition, and Idol currently meets none of them on paper. This is not an upsell bolted onto an insurance conversation — it is the condition precedent to theft cover at **all five insurers**, and it is the only lever that moves a 96% loss ratio.

REQUIREMENT	UNITS	WHOSE RULE
Tracking with recovery , vehicle value over R200,000	43	VAPS, eff. 1 Mar 2023
2-camera video telematics + tracking + monthly driver monitoring, long-haul HCV over R800,000	14	VAPS
Non-wired trailer tracker, battery ≥ 2 years, one per combination	23	VAPS
GIT load limit $\geq$ R1,200,000 → independent units on both trailer links, wired to Suzi power, 5-day battery backup, trailer-disconnect alerts	18 combos	VAPS — GIT is R2,000,000
Approved, paid-up, 24h-monitored device, vehicle over R500,000	20	ONE — current policy, today
Approved SVR with early warning , or no theft and hijack cover on goods	all 18	MiWay
VESA 3/4 or factory alarm on the rest	4	

THE CLAIMS RECORD IS A DRIVER PROBLEM

43 accident losses on 22 vehicles in three years — roughly one per vehicle per year — plus three thefts. Jun 2026 alone: 8 accidents, R518,737. Oct 2024: 17 accidents, R977,247. No insurer re-rates that down on a premium negotiation. Camera telematics and driver scoring is the only thing that changes the number at the next renewal.

WHAT TO QUOTE ALONGSIDE THE INSURANCE

43 tracking-and-recovery units · 14 dual-camera video telematics with monthly driver reporting · 23 trailer units to GIT specification on both links · driver scoring. **MiWay names Tracker and Netstar by name** — get Cartrack confirmed in writing as an accepted supplier at whichever market binds.

IN THE ROOM

"Before we talk premium — your own schedule says theft cover on twenty of your vehicles depends on a monitored tracking unit, and every line on it says none is fitted. You paid a R581,842 theft claim in February last year. I would fix that whether or not you move a cent of this policy."

The Naked Truth

Six places OWNsurance is weaker or unproven. A transport client who has been quoted five times this month **will find these**. Raise every one before they do.

1 ► The quote is expressly subject to a satisfactory claims history — and the history is 96%.

Line one of the OWNsurance quotation. R2,402,455 paid in 24 months against R2,491,002 of motor premium.

SAY "I've asked them to confirm in writing that they've rated on your actual record before I put a number in front of you. I'm not going to quote you a price that moves."

2 ► The goods cover drops from 16 countries to 11.

Angola, Uganda, Rwanda and Kenya fall away. Zambia, Tanzania and DRC to Kolwezi are retained.

SAY "Tell me what you actually run. If Kenya and Angola are live routes I'll ask for them back before we bind — and if they're not, we're not paying for territory you don't use."

3 ► Twelve-month lock-in, and cancelling forfeits the fund.

Cancel inside the year and any surplus is forfeited; a negative balance is payable on demand.

SAY "It's an annual contract and I'd rather you hear that from me. You're committing for twelve months — which is why the three confirmations matter before you sign, not after."

4 ► Third party is R10m for general haulage — R5m for petrol and diesel, R2.5m for chemicals.

The fleet carries fuel trailers, DC tankers and a tri-tank. If petroleum moves, the headline limit is not the limit.

SAY "What goes in the tankers? I need that on record, because the liability limit follows the load and I'm not letting you find that out at a claim."

5 ► Public liability R20,000,000 and driver personal accident are not on the quote at all.

ONE carries both; OWNsurance quotes neither.

SAY "Two sections aren't on this quote and I'm not letting them lapse quietly. I'll place them alongside so your position is whole."

6 ► Sums insured only adjust at renewal, and there is a confidentiality clause.

No mid-term value corrections. The client may not disclose the product structure to another broker or underwriter.

SAY "Get your values right now, because they're fixed for twelve months. And yes — there's a confidentiality clause on how the product works. I'd rather point at it than have you find it."

The Battlecard

THE SAVING

R14,656/mo

≈ R175,878 a year

THE EXCESS

R10,000 → nil

GIT R50,000 → R5,000

THE COVER

R10m held

agreed value held too

OPEN

"Before we talk price — your schedule says theft cover on twenty vehicles depends on a monitored tracker, and it records none fitted. Let me start there, then show you what five markets came back with."

THE OBJECTIONS YOU'LL HIT — AND THE WORDS THAT ANSWER THEM

"MiWay is cheaper. Why aren't we taking that?"

- ✓ Because it isn't the same policy. Your trucks move from agreed value to retail — a 2013 MAN settles at book, not at your figure. All your loads share one R2,000,000 limit instead of R2,000,000 a truck. The goods excess doubles to R100,000. Theft of a load by your own driver is excluded. And nothing is covered outside South Africa. That's not R10,000 cheaper, that's a different product.

"The OWNsurance quote says I save R341,670 a year. You said R175,878."

- ✓ Both are true and they're different things. R175,878 is what you stop paying. R341,670 is your own money going into your own fund, which pays your own first claims — you get back whatever the claims haven't used. On your record I'd expect the fund to be working hard, so I'm selling you this on the excess, not the rebate.

"So what actually changes when I claim?"

- ✓ Today you pay R10,000 on every motor claim and R50,000 on a load. On this you pay nothing on own damage, theft, hijack or third party, and R5,000 on a load. You had eight accidents in June alone — that's R80,000 of excess you wouldn't have paid.

"King Price came in about the same. Why not run that?"

- ✓ It's R606 a month more than you pay now and it takes your third-party liability from R10 million to R2.5 million — R1 million if there's a fire. One serious accident on the N3 and that difference is the whole business. I'm not putting that in front of you as an option.

NIGHT BEFORE • 60 SEC

- ☐ R148,370.94 → R133,714.43
- ☐ excess R10,000 → nil, GIT R50,000 → R5,000
- ☐ 43 units + 14 dual-camera
- ☐ R10m third party, agreed value — held
- ☐ the fund is R42,122.54/mo of their own money
- ☐ loss-ratio letter is a gate, not a nicety

CLOSE LIKE THIS

"My recommendation is OWNsurance — less money, the same R10 million liability, agreed value kept, and no excess when you claim. Three things get confirmed in writing first: that they've rated on your real claims record, which countries the goods cover reaches, and what the tankers carry. Give me the go-ahead and I'll have all three back this week."

THE REFRAME THAT WINS THE ROOM

Everyone else has quoted them a price. Nobody has told them their theft cover is conditional on trackers they don't have, or that two of the quotes stop at the border. Lead with the thing that costs them nothing to hear and everything to ignore — then the premium is a formality.
