INSURANCE REVIEW · 16 SEPTEMBER 2026

All 215 Vehicles, Read Properly

Your second fleet schedule reached us on 16 September and it changes our answer. **The market has come back dearer on the motor, not cheaper. Goods in transit still saves you money. And there are four things on your own schedules worth more than either.**

MOTOR TODAY

OUTsurance, in force

Santam, in force

Two motor policies, not one, reconciled to the cent

Until 16 September we had one of your two OUTsurance schedules. The 108 page schedule for **policy OT78078997** arrived and it insures a further **185 vehicles and trailers**. Between the two policies you insure **215 items and they share no registration number**. Every figure we sent you before this page was built on 30 of them.

OT78078997 R97,875.36 185 items, since June 2022	OT89649119 R75,457.10 30 items, since August 2026	MOTOR TODAY R173,332.46 R2,079,990 a year	GOODS IN TRANSIT R41,666.67 Santam, R500,000 a year
---	--	--	--

SECTION	OT78078997	OT89649119	TOGETHER
Motor fleet, vehicles 65 vehicles and 26 trucks respectively	R51,221.38	R62,854.24	R114,075.62
Motor fleet, trailers 120 and 4	R23,953.62	R1,717.12	R25,670.74
Public liability R11,664,000, on the older policy only	R1,853.59	none	R1,853.59
Sasria	R20,846.77	R10,885.74	R31,732.51
All in, per month	R97,875.36	R75,457.10	R173,332.46

✓

THIS ALSO ANSWERS THE QUESTION WE PUT TO YOU LAST WEEK

We asked what insured the other 184 vehicles, because one quotation covered 214 and the schedule we held covered 30. **Nothing is uninsured**. The second policy accounts for all of them, and the market quotation matches your real fleet almost exactly.

CLASS	YOUR TWO POLICIES	QUOTED	MATCH
Trucks and heavy commercial	54	55	within one
Trailers	124	124	exact
Cars and light commercial	37	35	within two
Sasria, a statutory rate on declared values	R31,732.51	R31,511.54	R221 apart
Items	215	214	the same fleet

Because it is the same fleet, the rates can be compared directly, and this is where it gets interesting.

COST PER VEHICLE, PER MONTH	YOUR POLICIES	EACH	QUOTED	EACH
Trucks and heavy commercial 54 against 55	R97,494.08	R1,805.45	R92,567.83	R1,682.14
Trailers 124 against 124	R25,670.74	R207.02	R23,694.10	R191.08
Cars and light commercial 37 against 35	R16,581.54	R448.15	R11,091.06	R316.89
Vehicle sections	R139,746.36		R127,352.98	-R12,393.38

SO WHY IS THE QUOTATION DEARER? BECAUSE OF WHAT SITS ON TOP OF THOSE RATES

Vehicle for vehicle the quoted rates are better than yours, by **R12,393.38** a month. Then the quotation adds **towing R17,529.16**, a clean-up liability of **R1,000,000 at R11,000.00**, windscreen extensions R2,750.00, assistance R1,605.00 and a general charge R190.00: **R33,074.16** a month of additions. Your policies carry roadside assistance, extended territories, pollution cover, loss of keys and passenger liability **inside** those vehicle rates, and add a public liability section of R11,664,000 for R1,853.59 that the quotation does not include at all.

Net result: **R191,938.68** against **R173,332.46**, so **R18,606.22** a month more, about **R223,275** a year. Our advice is that the motor stays exactly where it is until the towing and clean-up lines are requested.

Both your motor policies say they do not cover vehicles carrying hazardous materials

Both OUTsurance schedules record your business as **"Service & Repair, Transport, Goods"** and both print this under Fleet special conditions:

FROM YOUR OWN SCHEDULES

"OUTsurance does not provide cover in the following instances:

- * for code 4 (demolished) vehicles
- * when the vehicle transports money
- * when the vehicle transports hazardous materials**
- * when the vehicle transports people ..."

The goods in transit submission prepared for you on 14 September describes what you carry as:

△ FROM THE GOODS IN TRANSIT SUBMISSION

"General Goods, **Diesel, Petrol, Illuminated Paraffin, Jet Fuel**, FMCG, Scrap Metal and Scrap Batteries."

Diesel, petrol, paraffin and jet fuel are hazardous materials. On the face of these documents, the vehicles carrying them sit outside the motor policies that are supposed to cover them.

AND THE CONTRADICTION IS IN THE INSURER'S OWN WORDS, TWICE

The same schedules sell you **environmental impairment liability of R5,000,000 per vehicle** on 52 of your trucks. The conditions attaching to that cover read:

"owners, drivers and operators must be familiar with legislation and other requirements relating to **the transport of dangerous substances and goods** ... a **professional driving permit for vehicles transporting dangerous goods** will also be required."

One page excludes hazardous materials. Another prices dangerous goods liability and tells you which permits your drivers must hold. Both are on the same document.

WHAT WE HAVE ASKED FOR

A written confirmation from OUTsurance, reflected on both schedules, that either the hazardous materials exclusion does not apply to your fleet, or that it does.

We are not asking you to change anything on the strength of this. We are asking you not to decide anything until it is answered. 215 vehicles and a projected bonus of R562,632 turn on the answer, and so does the size of the spill cover you need to buy.

Spill clean-up: you have more than we thought, and less

On a general freight fleet the decisive cover is the third party limit. On a tanker fleet it is what pays to clean up a spill, because that is the loss that runs into millions before anyone has counted the vehicle.

	LIMIT	VEHICLES	MONTHLY
OUTsurance OT78078997 claims made, retroactive to 1 January 2025	R5,000,000 each	26 trucks	R895.33
OUTsurance OT89649119 claims made, retroactive to 30 June 2026	R5,000,000 each	26 trucks	R2,588.51
Alpha, quoted clean-up costs, leakage from vehicle	R1,000,000 heavy commercial only		R11,000.00
What you hold today, across both policies	R5,000,000 each	52 trucks	R3,483.84

✓ THE COVER YOU ALREADY HAVE IS FAR BETTER THAN THE QUOTED REPLACEMENT

R5,000,000 a vehicle on 52 trucks for R3,483.84 a month, against R1,000,000 for R11,000.00 a month. Three times the price for a fifth of the limit. That single line is R11,000 of the R18,606 by which the quotation is dearer, and we have sent it back.

△ BUT THERE IS A HOLE IN IT, AND IT IS ON YOUR SIDE TOO

Not one of your 124 trailers carries pollution cover, on either policy. Every trailer item shows third party liability of R5,000,000 and nothing else. The quoted alternative has the same gap.

On a tanker fleet the product is in the trailer, not the horse. A spill from a tanker trailer may fall outside an extension written only against the truck. We flagged this as a weakness in the quotation. Having now read your own schedules, it is a weakness in what you hold.

THE PRODUCT THAT ANSWERS IT, NOW QUOTED

Enviroasure Spill Protect Plan, Transport, underwritten by Centriq, R15,890.00 a month. Cover for the exact goods you carry, diesel, petrol, illuminated paraffin, jet fuel, general goods, scrap metal and scrap batteries: **transportation of dangerous goods R5,000,000**, third party liability solution R5,000,000, riot and strike R2,500,000, transfer assist R250,000, side tank R150,000. **Excess nil inside and outside South Africa**, except a flat R10,000 on third party liability claims. 27 specified vehicles.

We are not putting that price in front of you yet, because if your existing R5,000,000 per truck stands, this largely duplicates it on the trucks and what you actually need priced is the trailers. We have asked for both versions. **The answer on page 03 decides which.**

ACT ON THIS ONE REGARDLESS

The Enviroasure quotation is dated 14 August and was valid until 14 September. That date has passed. It needs reconfirming before any version of it is presented.

The one place we can give you a straight saving today

Both documents are built on the same **R50,000,000 annual carry**, and the limits line up almost exactly. This is a genuine like for like.

		BASIS	MONTHLY
Santam Specialist Marine AMDBLE265448M, via Sterling Hamilton Wright		R50,000,000 at 1.00%, R500,000 a year including VAT and strikes at 0.05%	R41,666.67
New National Assurance via Nautical Underwriting Managers		R50,000,000 at 0.90%, R450,000 a year, plus Sasria R1,712.15	R39,212.15
Difference		about R29,454 a year	-R2,454.52
LIMIT	SANTAM, TODAY	NEW NATIONAL, QUOTED	
Any one carrying conveyance	R1,620,000	R1,620,000 ✓	
Driver fidelity	R1,620,000	R1,620,000 ✓	
Tarpaulins, nets, ropes, chains	R25,000	R25,000 ✓	
Salvage and load recovery	R25,000	R25,000 ✓	
Debris removal	R25,000	R30,000	
General excess	10% min R10,000	10% min R10,000 ✓	
Hijack and theft excess	25% min R25,000	25% min R25,000 ✓	
Territories and your motor schedule pays R187,341 a year for extended territories, so you use them	RSA, Eswatini, Botswana, Mozambique	Twelve , adding DRC, Namibia, Lesotho, Angola, Kenya, Zimbabwe, Zambia, Malawi	

✓ ONE OPEN QUESTION IS NOW CLOSED

We asked last week whether the extra eight territories were worth anything to you. Your fleet schedule answers it: **extended territories is bought and paid for on every one of your seven insured fleets, R15,611.75 a month, R187,341 a year**. You cross borders, so the wider cargo territory is a real gain rather than a line on a page.

TWO THINGS TO SETTLE BEFORE WE MOVE IT

1. Who is named. Your Santam policy insures **Bakers Tankers, Bakers Bulk and MG Carriers**, and so do both OUTsurance schedules. The new quotation names **Bakers Tankers alone**. As it stands, moving would leave two of the three entities without goods in transit cover. That is a correction, not a negotiation.

2. An extra excess on high value loads. The new quote adds, on top of the normal deductible, a further **25% of claim, minimum R25,000**, on "high risk cargo" worth more than R1,000,000 unless the load has an armed escort. Its own example puts a R1,500,000 hijacked load at **R525,000 of total excess**. Its definition includes copper and similar metals, and batteries. **Your scrap metal and scrap battery loads would fall into it**. Fuel does not. We are getting

that confirmed in writing.

What we recommend, and the four things worth more than the re-market

THE NUMBER THAT SETTLES THE MOTOR QUESTION

Your two OUTsurance policies project a **Business OUTbonus of R255,621.49 on 27 February 2028 and R307,010.54 on 7 August 2028. R562,632.03 in total.** An OUTbonus is only paid at a claims ratio of 30% or less, so both policies are running well. **Moving the motor forfeits it, on top of paying R18,606 a month more.** We are telling you this even though it argues against a change, because you should hear it from us.

WHAT WE FOUND ON YOUR OWN SCHEDULES	WHERE IT STANDS	WHAT IT IS WORTH
Tanker trailer values nine tankers insured at R56,047 each, one 2017 unit at R729,000, six at R1,293,750	unqueried by either insurer	the largest single exposure in the file
Three vehicles with no theft cover tracking recorded as required and not installed	live today	fix this week
No pollution cover on any trailer 124 of them, on both policies	standing gap	page 04
No defective products or workmanship cover your own insurer recommends it in writing and it is not selected	not quoted anywhere	on R150m of turnover

OUR RECOMMENDATION

- Keep the motor where it is.** It is R18,606 a month cheaper, its excesses are far better on any serious loss, its pollution limit is five times the quoted one, and leaving forfeits R562,632.
- Get the hazardous materials answer in writing.** It is the one thing that could change all of the above.
- Move the goods in transit** once all three entities are named and the high risk cargo definition is confirmed. That saving is real, about R29,454 a year.
- Have the tanker trailers valued** before anything is signed with anyone. Nine of them are insured for roughly what the axles are worth.
- Price the spill cover to fit the answer** on point two, trailers only or the full 27 vehicles.

ONE OPERATIONAL ITEM THAT IS WORTH MONEY EITHER WAY

The new goods in transit terms make theft cover on **any load over R500,000** conditional on **live satellite tracking, operational at the time of the claim**, or a convoy of at least three vehicles. A full fuel load is comfortably over R500,000, so in practice that is every trip, and it applies to the **trailer** as much as the truck, because the cargo travels with the trailer. Your motor schedules already require an approved device on 30 vehicles, and record three of them as not fitted, which means no theft or hijack cover on those three today. Cartrack is named on OUTsurance's approved list.

SMALLER THINGS WE WILL CLEAN UP

Your registered address appears as **15 Nereeniging Road, Alberton 1449** on one policy and **15 Vereeniging Road, Alberton 1451** on the others. **Your VAT and company registration numbers are blank on both OUTsurance schedules**, which is why they cannot serve as tax invoices. The two policies carry different loss of keys limits and contradict each other on whether containers are used. The new goods in transit quote carries no inception date and describes your loss history as clean for three years, which does not match the motor record. None of these change the advice, all of them should be right before anything is signed.
