

MARKET REVIEW · 21 SEPTEMBER 2026

Seventy Vehicles, Three Markets, One Gap

Your policy and both quotations reconcile to the cent. Two markets come in below what you pay today. **But the most important number in this pack is not a premium. It is that most of your fleet has no theft or hijack cover right now, under a warranty on the policy you already hold.**

MARKETS APPROACHED

● Natsure / Compass

● Alpha / Guardrisk

Hollard, your current insurer

All three documents reconciled to the cent

Your current schedule runs to 175 pages and 24 possible sections, of which **seven are taken**. We have added up every section, fee and Sasria line on all three documents and each one ties exactly to its own stated total. Nothing below is an estimate.

CURRENT, HOLLARD R545,849 policy NBUS2-0213978	NATSURE / COMPASS R461,855 -R83,994 a month	ALPHA / GUARDRISK R423,308 -R122,541 a month
---	--	---

COMPONENT	CURRENT	NATSURE	ALPHA
Insurance sections seven sections on the current policy	456,980.26	433,408.09	400,876.72
Policy fees	10,050.00	0.00	0.00
Sasria statutory, on declared values	23,702.88	25,287.22	22,431.67
Value added products car hire, roadside, credit shortfall	55,115.81	3,160.00	0.00
All-in monthly	545,848.95	461,855.31	423,308.39

WHY THIS MATTERS

The bottom row is the only one worth comparing, and even then not straight across. The row above it is the reason: **R55,115.81 a month of what you pay today is not insurance cover at all**. Page 4 sets that out.

THE HONEST RANGE

Compared as quoted, Alpha saves **R122,541 a month**. Compared like for like, once the car hire, roadside assistance and credit shortfall you buy today are taken out of your side of the table, the saving is **R67,425 a month**. Both numbers are true. We would rather you heard the second one from us than found it later.

THE SEVEN SECTIONS YOU CARRY	
Motor specified	348,707.72
Business all risks	91,432.06
Electronic equipment	8,300.68
Fire	4,052.28
Theft	2,466.66
Office contents	1,785.87
Accidental damage	234.99
Total	456,980.26

- THE SEVENTEEN YOU DO NOT**
- Public / broadform liability
 - Employers' liability
 - Umbrella liability
 - Business interruption
 - Goods in transit
 - Fidelity
 - Money, glass, accounts receivable
 - Machinery breakdown
 - Directors' and officers', cyber
 - Group personal accident
 - Buildings combined, solar, motor traders

Most of the fleet has no theft cover today

Your current policy makes theft and hijack cover conditional. This is not a recommendation or a suggestion in the wording. It is a **condition precedent to liability**, which means the insurer does not have to pay if it is not met.

TRACKING DEVICES WARRANTY, VALUE OVER R500,000

"In the event of loss or damage to the vehicle as a result of theft and/or hijacking it is precedent to the liability of the Company, that the insured vehicle is fitted with an early warning tracking and recovery system", linked at all times, operational and armed, with the subscription kept up to date. Two further clauses on the same schedule require one device and two devices on specified vehicles.

Against that, this is what your own schedule records for the fleet:

WHAT THE SCHEDULE SAYS	VEHICLES	SUM INSURED
Tracking recorded as required 32 "Required" plus 18 "Early Warning System Required"	50	–
Tracking device actually installed Beame, C Track and Bidtrack, one each	3	–
Alarm system fitted every vehicle reads "None"	0	–
Fleet above the R500,000 threshold 45 heavy vehicles, 2 trailers, 2 buses	49	58,257,591

WHAT WE RECOMMEND, WHATEVER YOU DECIDE ON PRICE

Fit and activate approved tracking across the fleet, and get written confirmation from the insurer that the warranty is satisfied. **This costs a fraction of one truck and it is the difference between being insured for theft and not being insured for theft.** It applies equally on both quotations: Natsure requires tracking on 63 of the 70 and Alpha requires it too. Moving insurer does not make this go away.

CLASS	UNITS	SUM INSURED	TRACKING FIELD ON YOUR SCHEDULE
Commercial heavy Isuzu FTR and FRR, one Volvo truck-tractor	45	53,132,476	Required, not installed
Private and luxury cars eleven exceed R350,000	15	18,219,979	Required, not installed
Trailers drawbar and tridem axle	2	3,386,929	No tracking field at all
Light delivery vehicles	6	2,917,060	Mixed
Buses Iveco 50C15 Sisonke midibuses	2	1,738,186	Required, not installed
Fleet total	70	79,394,630	

WHAT IT COSTS YOU IF A TRUCK GOES

The average heavy vehicle on your register is insured for **R1,180,722**. If it is stolen or hijacked and the warranty was not met, the insurer is entitled to decline the claim in full. The most valuable single unit on the schedule is a **tridem axle trailer at R2,689,098**, and a trailer carries no tracking field at all.

MOVING INSURER DOES NOT SOLVE IT

Natsure requires a device on **63 of the 70** and gives a **nil theft excess** where an approved tracking and recovery unit is operational, against **10% of the vehicle's value** where it is not. On your dearest truck that single clause is worth **R201,267 a claim**. Alpha requires tracking and charges **15% of the claim, minimum R3,000** on theft.

Three lines account for R11,098 a month

Before comparing insurers it is worth seeing what your present spend is buying. Three items on your schedule, none of them a truck, come to just over a fifth of the programme.

ITEM	SUM INSURED	COST A MONTH	COST A YEAR
Value added products car hire 30 and 45/60 day, HCV roadside, credit shortfall, scratch cover, fees	–	55,115.81	661,390
32 bicycles specified individually on business all risks	6,357,177	37,083.54	445,002
One air conditioner rated at about 9.9% a year on an all risks basis	2,298,999	18,898.45	226,781
Total 20.4% of the all-in monthly premium	8,656,176	111,097.80	1,333,173

THIS IS NOT A CRITICISM, IT IS AN OPPORTUNITY

Every one of these is a legitimate insured item and they stay insured on both quotations. The point is that they are **priced** rather than fixed. Alpha re-rates the bicycles from 7.00% to 6.00% and the air conditioner from 8.50% to 5.20%, worth roughly **R14,234 a month** on those two lines alone. That is a meaningful part of why Alpha is cheaper, and it is worth asking your current insurer to match it before you move anywhere.

THE VALUE ADDED PRODUCTS NEED A DECISION

Car hire for 45 to 60 days costs **R30,989 a month** and HCV roadside assistance **R10,989 a month**. Credit shortfall costs **R4,329 a month** and **neither quotation includes it**, on a fleet with finance noted. These are worth keeping or dropping on purpose, not by accident, and we have asked both insurers to price all three.

VALUE ADDED PRODUCT	PROVIDER	COST A MONTH
Car hire, 45 or 60 days	Empire Insurance Administrators	30,989.00
HCV roadside assistance	Key Alliance Group	10,989.63
Commercial motor fleet fee	ASI Blue	5,037.50
Credit shortfall not included on either quotation	Infinite Credit Underwriting Managers	4,328.69
Scratch cover	Empire Insurance Administrators	1,785.00
Car hire, 30 days	Empire Insurance Administrators	1,342.00
Commercial assistance	Key Alliance Group	643.99
Total R661,390 a year		55,115.81

WHAT ELSE SITS ON BUSINESS ALL RISKS

The section specifies **275 individual items** totalling about **R14.7 million**: 69 cell phones, 69 laptops, 37 office machines, 21 computers, scanners and the bin tracking and management system at R35,000. It is a well kept register and it is the reason the section can be re-rated rather than re-built.

ONE NUMBER THAT LOOKS TOO SMALL

Theft is written as **R370,000 first loss** across the whole policy, against **R13,209,515** of business all risks and **R2,856,318** of stock at Lanseria. A burglary that takes a room full of laptops and bicycles would exhaust it. Worth revisiting whoever carries the risk.

There is no public liability, on any of the three

Tshenolo Waste places sharps containers and waste containers into hospitals and clinics, collects and transports medical and hazardous waste, and runs hazardous waste training. Almost all of that happens on somebody else's premises.

LIABILITY SECTION	CURRENT	NATSURE	ALPHA
Public / broadform liability injury or damage you cause to others	Not taken	Not quoted	Not included
Products liability a container that fails after delivery	Not taken	Not quoted	Not included
Employers' liability injury to your own staff beyond COIDA	Not taken	Not quoted	Not included
Motor third party liability the only liability cover in force	2,500,000	5,000,000	2,500,000
Clean-up and spillage leakage from a vehicle, substance transported	Not taken	250,000	Not taken
Fare-paying passenger liability two 16-seat midibuses	Not taken	Not taken	Not taken

PLEASE READ THIS ROW TWICE

This is a gap you already have, not one created by moving. Your policy has carried no public, products or employers' liability since at least 1 August 2024. The only liability cover in force anywhere in the programme is the motor third party limit. For a business whose work is done inside hospitals, that is the single most serious thing in this pack.

WHAT WE ARE DOING ABOUT IT

We have gone back to both markets to price **public liability, products liability and employers' liability** as an addition. We would rather present you a slightly dearer programme that covers your actual exposure than a cheaper one that does not. **Natsure's R5,000,000 third party limit and its R250,000 a vehicle clean-up cover are both genuine additions to what you hold today.**

CONDITIONS ON YOUR CURRENT POLICY

- Firefighting equipment serviced annually, records kept
- Gas installations to SANS 10087-1
- Hot work permit system, **cover suspended from the moment of breach**
- Computer equipment excluded from the fire section
- Micro-organism exclusion, absolute

ALSO ABSENT EVERYWHERE

- Business interruption, on one main premises
- Goods in transit, on a collection and transport business
- Fidelity, money and glass
- Machinery breakdown on R12.8m of plant at Denver
- Environmental impairment liability under NEMA

A NOTE ON CLEAN-UP AND POLLUTION

Natsure's R250,000 a vehicle for clean-up is a welcome addition, but it is a **motor extension**, not environmental impairment liability. It responds to leakage from the vehicle. It does not respond to a statutory clean-up order under NEMA, and it is quoted on the 45 trucks only, with **nothing on the two trailers**, one of which is a 15,500mm tridem axle unit insured for R2,689,098 and is the vehicle most likely to spill. We are pricing a separate spill solution so you can see what the real number looks like.

One quotation is short by R4,953,201

Your vehicle asset register lists **70 vehicles totalling R79,394,630**. That register is the benchmark, and it settles a disagreement between the two quotations.

CLASS	YOUR REGISTER	NATSURE	ALPHA
Commercial heavy 45 vehicles	53,132,476	53,132,476	49,232,600
Private and luxury cars 15 vehicles	18,219,979	17,847,679	17,447,259
Trailers 2 units	3,386,929	3,386,929	3,386,929
Light delivery vehicles 6 vehicles	2,917,060	2,917,060	2,636,455
Buses 2 Iveco Sisonke midibuses	1,738,186	1,738,186	1,738,186
Total	79,394,630	79,022,330	74,441,429

WHY A SHORTFALL MATTERS MORE THAN IT LOOKS

If a vehicle is insured for less than it is worth, the insurer applies **average** and pays the same proportion of the loss. On Alpha's heavy vehicle values a total loss would settle at roughly **92.7 cents in the rand**. Natsure has copied your register to the rand on four of the five classes and is short only on the private cars. **Both must be corrected to R79,394,630 before anything is signed**, and we have asked for that in writing.

ONE MORE THING TO FIX ON YOUR OWN SCHEDULE

The index page of your current policy prints the motor sum insured as **R61,354,333**, while the asset register four pages later totals **R79,394,630**. The register is the figure the premium is calculated on. We have asked your current broker to correct the index, because a schedule that misstates its own largest sum insured is exactly what gets argued at claim stage.

TWO VEHICLES, TWO DIFFERENT YEARS

A BMW X5 is quoted as a **2026** by one insurer and a **2023** by the other; a BMW M135i as a **2025** and a **2024**. Your schedule settles both. We have asked for the corrections rather than picking the higher figure, because an inflated year inflates the premium as surely as a low one under-insures the car.

SASRIA IS DECLARED ON THE WRONG BASIS

Your fifteen private cars are declared to Sasria as **Goods Vehicles**, and the fleet declaration of **R59,436,465** is short of the heavy fleet by **R1,738,186**, which is exactly the two buses. Sasria is a statutory rate on declared values, so this is worth correcting on whichever policy runs.

THE FLEET ITSELF IS YOUNG, AND THAT HELPS YOU

Every vehicle on the register is **2019 or newer**: two from 2019, nine from 2020, one from 2021, seven from 2022, six from 2023, twelve from 2024 and eight from 2025, plus a 2025 Volvo FH 520 truck-tractor at R2,617,300. That matters because Natsure requires an inspection certificate for every vehicle ten years and older, and on your fleet **that condition affects no vehicle at all**. It is one of the few conditions on either quotation that you have already satisfied.

Our recommendation, and what has to happen first

AS QUOTED, BEST CASE

-R122,541/mo

Alpha against your current total

LIKE FOR LIKE

-R67,425/mo

once the extras are matched

NOT YET PRICED

Liability

public, products and employers'

There is a real saving here on either reading, and it is large. We are not recommending that you bind either quotation today, for three reasons that are all fixable within a fortnight.

1 Tracking, before anything else

Fit and activate approved tracking across the fleet and get the insurer to confirm the warranty is met in writing. Until that is done your theft and hijack cover is conditional on something your own schedule says is missing, on R58,257,591 of vehicles.

2 Get liability priced

Public, products and employers' liability from both markets. A waste business working inside hospitals should not be carrying only a motor third party limit.

3 Correct the sums insured

Both quotations re-rated to your register total of R79,394,630, and the two disputed vehicle model years resolved against your schedule.

4 Decide on the extras deliberately

Car hire, roadside assistance and credit shortfall, worth R46,307 a month between them. Keep them, priced by the new insurer, or drop them knowingly.

5 Release the claims record

Both quotations are conditional on three years' claims experience confirmed in writing. Until that is provided neither price is firm, and we will not present a number to you as final that the insurer can still move.

BOTTOM LINE

On the figures in front of us Alpha is the better price and Natsure is the better policy. Alpha is R38,547 a month cheaper than Natsure, but Natsure carries double the third party limit, adds clean-up cover on the trucks and has quoted your fleet at the right values. Once liability is priced by both and the sums insured are corrected, we expect the gap to narrow and we will come back to you with a final recommendation. **The tracking point should not wait for any of that.**

WHAT HAPPENS NEXT

We go back to both markets this week for liability pricing, the corrected sums insured and the three value added products. Natsure's fleet quotation is effective **1 October 2026** and its commercial quotation **1 November 2026**, a month apart, which must be aligned before either incepts. Alpha's is **1 October 2026**. We will come back with a final recommendation once the claims record has been released.
