Fleet & Cargo Insurance Review

Your Santam Heavy Haulage programme taken to the market and read line by line against the quotation that came back — section by section, vehicle by vehicle, and cover by cover.

27 VEHICLES · R31.3M INSURED · EVERY FIGURE TAKEN FROM THE TWO SCHEDULES

Santam — current

Petrosure / Old Mutual Insure

● Reconciled to the cent

They answered everything. Two answers decide it.

You pay **R131,719.79** a month to Santam on policy 10000064816. Petrosure, on behalf of Old Mutual Insure, has now issued a corrected quotation at **R123,300.02** — a saving of **R8,419.77** a month, or **R101,037 a year**. We put fifteen questions to them. **Five came back exactly as we wanted, four are still open, and six were refused.** Two of the refusals are the reason we are still recommending you stay.

SANTAM • CURRENT

R131,719.79

THE SAVING IS

6.4%

≈ R101,037 a year

SECTION	SANTAM — CURRENT	PETROSURE	MOVEMENT
Motor — 27 specified vehicles Sum insured now matches yours exactly: R31,311,815.	R105,452.84	R103,604.17	-R1,848.67
Cargo / goods in transit R1m per load on both — but see page 4.	R14,918.01	R6,666.67	-R8,251.34
Public liability R10m per event, no aggregate — now confirmed in writing.	R1,452.32	R950.00	-R502.32
Roadside assistance Added — but only on the four light vehicles.	R13.00	R200.00	+R187.00
Sasria Statutory. We have queried the difference; the answer explained the method, not the gap.	R9,883.62	R11,879.19	+R1,995.57
Broker fee Petrosure has asked us for the figure.	R0.00	to be set	to confirm
All-in per month	R131,719.79	R123,300.02	-R8,419.77

RECOMMENDATION

Stay at Santam for now. Real progress was made — agreed value confirmed on your specialist tankers, your 2021 retroactive date held, the under-insured vehicle corrected, and the liability limits confirmed in writing. But **third party on your ten truck-tractors cannot go above R5 million against Santam's R10 million, and the cargo excess cannot be reduced at all.** Pages 3 and 4 set out why those two matter more than R101,037.

SOMETHING YOU SHOULD KNOW EITHER WAY

Neither policy covers pollution. Your Santam schedule reads "Environmental impairment liability — not included" against every vehicle, and Petrosure has confirmed they do not offer it. You move diesel for a living. Page 5.

What answers when your truck hurts someone

Third party liability is what pays when one of your vehicles injures a person or damages someone else's property. On a loaded fuel tanker it is the most important number in the policy. Santam sets it by vehicle class. **Petrosure has confirmed their ceiling is R5,000,000 per vehicle and that they cannot exceed it** — and the quotation as issued still shows R2,500,000.

VEHICLE CLASS	UNITS	SANTAM	AS QUOTED	THEIR BEST	GAP
Truck-tractors The horses: Iveco, FAW, Shacman.	10	R10,000,000	R2,500,000	R5,000,000	-50%
Tankers & heavy trailers GRW, Afrit, Trailer & Tanker Technology, Tank Clinic.	13	R5,000,000	R2,500,000	R5,000,000	CLOSES
Light vehicles Mahindra, Fortuner, GWM, Mercedes.	4	R2,500,000	R2,500,000	R2,500,000	SAME
Fleet sum insured	27	R31,311,815	R31,311,815	MATCHED	•

WHY THIS IS THE ONE WE WILL NOT LET THROUGH

A truck-tractor pulling a full four-compartment diesel tanker is the largest thing you put on a national road. Today it carries **R10 million** of third party cover. Petrosure's maximum is **R5 million**, and that is their ceiling, not their opening position. A single serious accident — several vehicles, injuries, a fire — passes R5 million, and everything above it comes out of the business. We have asked them to at least lift the quotation to their R5 million and price it, so you can see the whole picture.

TWO THINGS WE ASKED FOR, AND GOT

The under-insured vehicle is fixed. MG45VLGP (2025 Shacman X3000 480) was quoted at R1,516,105 against your R1,816,105. It now reads R1,816,105 and the fleet totals match to the rand.

Agreed value is confirmed. Petrosure has confirmed in writing that your specialist units — the GRW, Afrit and Trailer & Tanker Technology tankers — can be written on **Agreed Value**, subject to accepting the values at inception. The four light vehicles stay on retail, exactly as they are at Santam today.

AND YOUR LIABILITY HISTORY IS PROTECTED

Your public liability is written on a **claims made** basis with a **retroactive date of 20 August 2021**. Petrosure has confirmed that date will be carried across unchanged, subject to proof of uninterrupted cover. That protects five years of your past work — it was the single biggest technical risk in a move like this, and it is closed.

The same load limit, a very different excess

Both policies cover **R1,000,000 per load**. Read only that line and the sections look identical — yet Petrosure is R8,251 a month cheaper on cargo alone. The difference is not cover. It is **the part you pay when the load is gone**. We asked for an excess reducer. **The answer was that they are unable to offer one.**

LOAD LIMIT – BOTH

R1,000,000

identical, same 10 vehicles

SANTAM EXCESS

R20,000

flat, damage or hijack

PETROSURE, ON A HIJACK

R300,000

30% of the claim

ON A TOTAL LOSS OF A R1M DIESEL LOAD	SANTAM	PETROSURE	YOU PAY
Accident damage 10% of claim, minimum R1,500.	R20,000	R100,000	+R80,000
Theft or hijack 10% of claim, plus a further 20%.	R20,000	R300,000	+R280,000
The trailer itself, hijacked On a R2,400,000 tanker trailer.	R360,000	R480,000	+R120,000
Salvage & recovery of load	R25,000	not shown	QUERY

WHY THIS OUTWEIGHS THE SAVING, ON YOUR RECORD SPECIFICALLY

You have had **two trailers hijacked with their loads in the last two years**. That is the loss this business actually has — and it is precisely the excess Petrosure has said it cannot reduce. **One hijack would cost you R280,000 more on the load alone, against a saving of R101,037 a year.** A single incident takes back almost three years of the saving, and you have had two in two.

HOW SANTAM GETS TO R20,000

Santam's standard cargo excess is also a percentage — but your policy carries **two excess reducers**, bought deliberately, which bring the first amount payable down to a flat **R20,000** for both accident damage and hijacking. That is a purchase somebody made on your behalf and it is the single most valuable thing in your current programme.

ONE THING WE CAN CLOSE FOR YOU

Petrosure have asked for your **annual carry figure** — the total value of goods you move in a year. Your Santam schedule does not state one either, so it has to come from you. Without it the cargo section is rated on an assumption and would be re-rated after inception. We would rather have the real number now.

Nothing here pays to clean up a spill

This is not a comparison point. It is true of the policy you have now **and** of the one you were offered, and it is the single largest uninsured exposure we can see in your business.

WHAT THE DOCUMENTS ACTUALLY SAY

- **Santam.** Your schedule reads *"Environmental impairment liability — not included"* against **every one of the 27 vehicles**.
- **Petrosure.** No environmental or pollution section anywhere in the quotation. It carries "forecourt negligence" — which is fuel dispensed at a filling station, not fuel on a road.

WHAT THAT MEANS

If one of your tankers rolls and diesel reaches soil, a storm-water drain or a water course, **the clean-up, the rehabilitation, the monitoring and the regulator's costs are yours**. Those costs are not proportional to the load — a single incident at the wrong place can run to many times the value of the vehicle.

WHAT WE ARE DOING ABOUT IT

- ✓ We asked Petrosure to quote it. **They have confirmed they do not offer environmental impairment or pollution liability** — and pointed us to **Envirosure**, a specialist market.
- ✓ We are asking **Santam the same question** on your existing policy, so you are not waiting on any re-quote to close a gap you have today.
- ✓ We are taking it to **Envirosure as a standalone placement**. That is normal for fuel hauliers and it is a small premium against the exposure.

OUR VIEW

Of everything in this review, **this is the item we would fix first** — ahead of the premium, ahead of the re-quote. It is the only exposure here capable of ending the business rather than costing it money.

TWO SMALLER ONES, WHILE WE ARE HERE

Credit shortfall is on neither policy — Petrosure have confirmed they do not offer it — and Investec Bank and Redtree Capital interests are noted on your fleet. **Roadside assistance** has been added to the quotation, but Petrosure can only give it below 3.5 tons, so your **23 heavy units get none**; Santam includes breakdown towing, towing in and outside the RSA and wreckage removal on all of them.

Five closed, four open, and two that will not move

WHERE THE FIFTEEN QUESTIONS LANDED

- 1 Closed — and closed properly**
 Agreed value on your specialist tankers. Retroactive date held at 20 August 2021. MG45VLGP corrected to R1,816,105. Public liability R10m per event, no aggregate. Roadside added on the light vehicles.
- 2 Still open — we are chasing**
 Third party lifted to their R5m maximum and priced. Your annual carry figure so the cargo section is rated properly. The Sasria difference. Our broker fee, which they have asked us to set.
- 3 Refused — and these decide it**
 No cargo excess reducer. No environmental cover. No credit shortfall. The single-vehicle loading stays. And third party cannot go above R5m against your R10m.
- 4 The quotation is not yet rated on you**
 It records "loss history: to be advised" and is expressly subject to a satisfactory claims history. We are giving them your record now, so that any change to the price happens before you see it, not after.

RECOMMENDED TODAY

Stay at Santam

The cargo excess reducer on your current policy is worth more to this business than R101,037 a year, on the loss record you actually have.

STILL ON THE TABLE

-R101,037

a year, if the excess and the third party limit can be made to work. We will bring you a final figure the same day it lands.

IN ONE SENTENCE

The revised quotation saves you R8,420 a month. It also caps third party cover on your truck-tractors at half of what you carry today, and leaves you paying R300,000 instead of R20,000 the next time a load is hijacked — on a business that has had two trailers hijacked in two years. That is why we are recommending you stay, for now, and why the pollution gap on your existing policy is the thing we would like to close first.
