BAKERS TANKERS · INTERNAL · ROUND 3, 17 OCTOBER 2026 · ONE MOTOR + GIT

# Bakers Playbook

For Bronwan Fouche. **ONE is the first market under OUTsurance, by R4,407 a month on the same 215 vehicles.** It gets there by leaving out cross-border liability and pollution cover, with a worse truck excess. Not a switch yet. A real lever.

| ONE MOTOR | LEFT OUT BY ONE | FORFEITED IF MOTOR MOVES |
|---|---|---|
| **-R4,407** | **R15,612** | **R562,632** |
| a month, 215 of 215 matched | a month of cross-border cover at OUT | two OUTbonuses |

Internal working document · FSP 17266 · not for circulation outside Cartrack Insurance Agency (Pty) Ltd

PLAY 01

# ONE quoted the whole account. Closest yet, and still not a switch.

WHAT CAME IN (WHATSAPP, 1 OCT)

**HCV/1304264**, ONE: HCV Long Haul & GIT, OMART Insure (FSP 49551), printed 22/09/2026, 113pp: motor R136,537.78 + PL R1,200 + fee R100 + Sasria R31,087.88 = **R168,925.66/mo**.
**MARN/1305840**, ONE: Marine, printed 23/09/2026, 41pp: **R37,572.67/mo** (Play 05).

Both reconcile to the cent. **All 215 registrations matched one by one against OT78078997 (185) and OT89649119 (30): none missing, none added.** The two MAN TGAs are third party only on both sides (ONE R230 each against OUT R65.15 together).

| PER MONTH | BOTH OUT | ONE | DIFFERENCE |
|---|---|---|---|
| **Trucks**<br>54 OUT, 55 ONE (class grouping) | R97,494.08 | R92,155.75 | −R5,338.33 |
| **Trailers**<br>124 against 124 | R25,670.74 | R25,426.76 | −R243.98 |
| **Cars and LCV**<br>37 against 36 | R16,581.54 | R18,955.27 | +R2,373.73 |
| **Public liability R11,664,000** | R1,853.59 | R1,200.00 | −R653.59 |
| **Fee + Sasria** | R31,732.51 | R31,187.88 | −R544.63 |
| **All in** | **R173,332.46** | **R168,925.66** | −R4,406.80 |

⚠ WHAT ONE LEAVES OUT TO GET THERE

**1. Cross border liability cover: "No" on all 215.** OUT buys extended territories on all seven fleets, **R15,611.75/mo**. ONE's territory lists SADC to Kenya, but a third party claim in Zambia is uninsured. **2. No EIL.** "Spillage and leakage liability: Yes" at R34.50 a truck on 53 trucks, **no limit printed anywhere in 113 pages**; OUT has R5m per truck on 52. **3. Truck excess flat R30,000** vs OUT R11,400 to R26,640, and endorsement HCV 0004 says **5% of vehicle value min R5,000** (R75,000 on a R1.5m Actros) **plus 5% of claim between 23:00 and 04:00**, trucks and trailers. Schedule and wording contradict: get the flat R30,000 confirmed as governing. ✅ Better at ONE: trailers R5,000 (OUT R5,720), light R5,000 (OUT R6,840 to R9,320), PL excess R2,500 (OUT R8,020).

TWO OF OURS TO FIX ON THE ONE QUOTE

🛰️ **Nil theft excess only with "ONETRAK",** ONE's own tracking product; with any other device it is **10% of vehicle value**, and outside RSA without cross-border roaming the tracker counts as not operational (**20%**). **Cartrack is the broker on this quote. Get Cartrack written in next to ONETRAK.** Same fight as Tshenolo's Ctrack clause.
📋 **"Goods carried: TBA"** on the motor proposal. ONE's own marine desk has the fuel in writing; the motor underwriter does not. Declare it before anyone signs, or the hazmat question just moves insurer.

PLAY 02 · OPEN THE MEETING WITH THIS

PLAY 02

# Both motor policies exclude hazardous materials. They haul jet fuel.

FLEET SPECIAL CONDITIONS, ON BOTH SCHEDULES

"OUTsurance does not provide cover in the following instances: ... *** when the vehicle transports hazardous materials**"

Business description on both: **"Service & Repair, Transport, Goods"**. Nothing about tankers, fuel or dangerous goods. Turnover declared R150,000,000, 200 employees.

⚠ AND THE GOODS IN TRANSIT SUBMISSION, 14 SEPTEMBER

"General Goods, **Diesel, Petrol, Illuminated Paraffin, Jet Fuel**, FMCG, Scrap Metal and Scrap Batteries."

THE CONTRADICTION IS NOW IN OUTSURANCE'S OWN WORDS, TWICE

The same schedules price **environmental impairment liability R5,000,000 per vehicle** on 52 trucks, and the conditions attaching to it read:

"(5) owners, drivers and operators must be familiar with legislation and other requirements relating to **the transport of dangerous substances and goods**. ... a **professional driving permit for vehicles transporting dangerous goods** will also be required."

One page excludes the load. Another prices liability for it and tells the client which permits the drivers must carry. **Put both paragraphs in front of Virgil Niekerk and ask which one governs.**

HOW TO PLAY IT

Do not accuse the insurer. Say: "There are two paragraphs on your own schedule that point in opposite directions, and we would rather have it in writing than find out at claim stage." **215 vehicles and R562,632 of projected bonus turn on the answer**, and so does how much spill cover they actually need to buy. **Same shape as Twin Trans**, where the cheaper quote had dropped pollution on a fuel tanker.

**ONE's motor schedule prints no hazmat exclusion** (the wording pages are not in the PDF) and its marine quote accepts diesel, petrol, paraffin and jet fuel with SANS, licensing and driver warranties. That is the contrast to use with Virgil.

PLAY 03

# They have more pollution cover than we thought, and none of it is on the trailers

| | LIMIT | APPLIES TO | MONTHLY |
|---|---|---|---|
| **OT78078997**<br>claims made, retro 1 Jan 2025 | **R5,000,000 each** | 26 trucks | R895.33 |
| **OT89649119**<br>claims made, retro 30 Jun 2026 | **R5,000,000 each** | 26 trucks | R2,588.51 |
| **ONE HCV/1304264**<br>spillage and leakage liability, R34.50 a truck | no limit printed | 53 trucks | R1,828.50 |
| **Alpha V4**<br>clean up costs, leakage from vehicle, 0.240% | R1,000,000 | HCV table only | **R11,000.00** |
| **Held today, both policies** | **R5,000,000 each** | **52 trucks** | **R3,483.84** |

THE LINE TO USE ON ALPHA

**OUTsurance writes R5,000,000 per vehicle on 52 trucks for R3,483.84 a month. Alpha wants R11,000.00 a month for R1,000,000 on the heavy section only.** Three times the premium for a fifth of the limit. That is R11,000 of the R18,606 by which Alpha is dearer.

⚠ I GOT THIS HALF WRONG AND THE CORRECTION MATTERS

I told you the missing trailer clean-up was an Alpha regression. It is not. **Not one of the 124 trailers carries environmental impairment liability on EITHER OUTsurance policy.** Every trailer item shows sub-section B R5,000,000 and nothing else.

**On a tanker fleet the product is in the trailer.** So this is a live hole in what the client holds today, which is a stronger conversation than a criticism of a quote. Lead with it that way.

ENVIROSURE: REAL, PRICED, AND LAPSED

**Spill Protect Plan, Transport**, Envirosure FSP 38594, underwritten by **Centriq FSP 3417**, ref 20260814/FP/01, Adelle Hartley. **R14,850 + R500 Hazcall24 + R540 VAPS = R15,890.00/mo, R190,680/yr**, commission R1,923.75/mo in premium, broker fee R0.00. Dangerous goods R5,000,000, third party liability solution R5,000,000, riot and strike R2,500,000/R1,000,000, transfer assist R250,000/R50,000, side tank R150,000. Claims made, **retro = inception**. Territory Africa south of the Equator. 27 specified vehicles. Excess nil in and out of RSA except a **flat R10,000 on third party liability claims**.

🚨 **Dated 14 August, valid to 14 September. It has lapsed.** And the broker is printed as **"Vaps"**, attention Nadia Pelser, **not Cartrack**. Get the code fixed on the reissue or the commission goes elsewhere.

DO NOT QUOTE A SPILL PRICE UNTIL THE HAZMAT ANSWER IS IN

If the exclusion does NOT bite, the R5m per truck stands and Envirosure largely duplicates it on the trucks. What the client then needs priced is **trailers only**.
If the exclusion DOES bite, the EIL on 52 trucks is worthless and R15,890/mo is cheap.
**Ask Adelle Hartley for both versions now, so you have the number whichever way it lands.**

PLAY 04

# Four things wrong on their own schedules

### 1. THE TANKER TRAILERS ARE INSURED AT FIGURES THAT CANNOT BE RIGHT

34 trailers are described as tankers. Nine sit at **R56,047** each. Five at R95,659. Eight at R150,664. Two at R729,000. Six at R1,293,750.

A 2017 custom built road tanker is on at R729,000 while 1999 and 2006 tankers sit at R56,047. A fuel tanker trailer costs **R800,000 to R1,600,000** to replace. **And Alpha has copied the same values straight across**, R28,444,295 on 124 against OUTsurance's R27,454,899 on 120. The under-insurance travels onto the new quote. **Get a valuation. This is the most expensive line in the file and neither insurer has queried it.**

### ⚠ 2. THREE VEHICLES HAVE NO THEFT OR HIJACK COVER TODAY

Tracking recorded as **required** and **not installed**: **KZ73CSGP** (2023 Ford Ranger), **CB42HNZN**, **FJ04NTGP** (2006 Actros 2540). The schedule's own wording: "If the device is not installed or not in a working condition or the tracking subscription has not been paid, **you will have no theft or hijack cover**."

All 26 vehicles on OT89649119 require an approved device and that schedule records no fitment status at all. **Cartrack is named on OUTsurance's approved list**, on the schedule. No approval fight.

🛰️ **The lead: up to 179 units, 55 trucks and 124 trailers.** None of the trailers carries a tracking field on either policy, while CLP's GIT makes theft cover on any load over R500,000 conditional on live satellite tracking operational at the time of claim, or a convoy of three. A full fuel load is over R500,000 every trip. Three units are a compliance fix this week.

### 3. THEIR OWN INSURER RECOMMENDS COVER THEY HAVE NOT BOUGHT

**"Based on your industry type, we recommend the Defective Products optional cover, which is not currently selected."** Printed on the public liability section of OT78078997. Defective products and defective workmanship both optional, both untaken, on R150,000,000 of turnover and a business described as **service and repair**. The PL also excludes work on the property being worked on, professional advice, underground cables and pipes, and sub-contractors' work.

Also not taken anywhere: **credit shortfall** (with Absa Vehicle and Asset Finance's interest noted), business interruption, and passenger liability on Alpha's heavy section (OUTsurance has R5,000,000, 15 seats, for R763.93 across the fleets).

### 4. ALPHA WANTS TO INSPECT 61 VEHICLES BEFORE COVER ATTACHES

Alpha's condition: **"Any vehicle/s older than 20 years old will be subject to a full vehicle evaluation before comprehensive cover can be provided." 61 of the 215 items are 2006 or older**, including a 1955 Ford Customline, two 1999 SA Road Tankers, a 2000 International 9800i, a 2001 Volvo FL and 44 trailers of 2001 to 2006 vintage. That is 61 physical inspections, and a real chance some come back on third party terms only. Nobody has costed it.

PLAY 05 · THE ONE CLEAN WIN

PLAY 05

# Goods in transit: ONE is cheapest and pays us R102.72. CLP stays.

| | BASIS | MONTHLY |
|---|---|---|
| **Santam Specialist Marine**<br>AMDBLE265448M, Durban, broker of record<br>Sterling Hamilton Wright 4349453 | R50,000,000 at 1.00%, R500,000/yr incl VAT, strikes 0.05% | **R41,666.67** |
| **CLP / New National Assurance**<br>FSP 2603 via Nautical Underwriting Managers<br>FSP 43437, JP Liebenberg, 20% commission | R50,000,000 at 0.90%, R450,000/yr, plus Sasria R1,712.15 | **R39,212.15** |
| **ONE / OMART, MARN/1305840**<br>Bakers Bulk only, inception 01/01/3000 | R50,000,000 at 0.88%, Sasria R856, VAP R50 | **R37,572.67** |

🚨 ONE'S GIT PRICE CARRIES NO COMMISSION ON THE CARGO

"Intermediary commission R102.72" = **exactly 12% of the R856 Sasria**. Nothing on R36,666.67. CLP pays 20%. Either ONE quoted net by mistake or we place R440,000 a year for R1,233 a year. **Load 20% the way CLP does and it grosses up to about R46,739/mo, dearer than Santam.** Ask ONE before any GIT figure goes near the client. Also: **driver fidelity excluded** (Santam and CLP R1,620,000), **contamination excluded**, tarps R15,000, salvage + debris R25,000 combined, subcontractors excluded, **tracker WARRANTY on every truck and trailer** (breach = repudiation), copper and batteries excluded while "scrap metal and scrap batteries" is the declared cargo, and the memo totals R37,872.67 against the schedule's R37,572.67 (R300 slip). ✅ No High Risk Cargo loading, hazmat accepted in writing, SADC imports/exports.

✅ TERRITORY: THEY USE IT

I asked last week whether the extra eight territories were worth anything, because on Integral Trading the wide cargo territory turned out to be unused. **OT78078997 answers it: extended territories is bought and paid on every one of the seven insured fleets, R15,611.75 a month, R187,341 a year.** They cross borders. CLP's twelve territories against Santam's four is a real gain. Ask which countries, and check Alpha's territorial wording matches.

⚠ TWO FIXES BEFORE IT MOVES

**Named insureds.** Santam insures **Bakers Tankers, Bakers Bulk and MG Carriers**, and so do both OUTsurance schedules. **CLP names Bakers Tankers alone.** Same shape as the seven named insureds on Integral Trading.

**High Risk Cargo excess.** CLP adds **a further 25% of claim, minimum R25,000**, on cargo over R1,000,000 without an armed escort. Its own example: a R1,500,000 hijacked load, **R525,000 of total excess**. The definition includes **"Precious Metals including Copper, Cobalt, Ferro Chrome etc."** and **"Solar Panels / Batteries / Inverters / Generators"**, and the declared cargo includes **Scrap Metal and Scrap Batteries**. Fuel is not on the list. Get it in writing.

EXCESS IS WHERE OUTSURANCE WINS, AND IT IS NOT CLOSE

OUTsurance basic excess: **R11,400 to R26,640 per truck**, **R5,720** per trailer, R6,840 to R9,320 on light vehicles.
Alpha: **10% of claim, minimum R30,000** on heavy commercial and on all 124 trailers, 5% minimum R5,000 on light and private.

**On a R1,500,000 truck that is R150,000 at Alpha against R11,400 at OUTsurance. On a R150,664 trailer it is R30,000 against R5,720.** Say it in exactly those numbers.

PLAY 06

# What to say, and what to get in writing

### THE ONE NUMBER THAT SETTLES THE MOTOR

**Two OUTbonuses: R255,621.49 on 27 February 2028 and R307,010.54 on 7 August 2028. R562,632.03.** An OUTbonus is only paid at a claims ratio of 30% or less, so **both policies are running well**. ONE saves R52,882 a year, so **the bonus is ten and a half years of ONE's saving**. Raise it yourself before the client does. 🎯 **But it also gives you a date:** after 7 August 2028 both bonuses are paid and nothing is forfeited. ONE renews 01/09/2027 on its own quote. Keep ONE warm for mid-2028.

### THE RECOMMENDATION

| | | |
|---|---|---|
| 1 | **Keep the motor at OUTsurance.** | ONE is R4,407 cheaper but drops cross-border liability (R15,612/mo at OUT) and EIL, has a worse truck excess, and moving forfeits R562,632. |
| 1b | **Send ONE back** | for cross-border liability, EIL on trucks AND trailers, truck excess, Cartrack next to ONETRAK, fuel declared, all three entities named. |
| 2 | **Hazardous materials answer in writing.** | Everything else waits on it. |
| 3 | **Move the goods in transit to CLP** | once all three entities are named and High Risk Cargo is pinned. ONE only if it adds driver fidelity and confirms its commission. |
| 4 | **Value the tanker trailers** | before anything is signed with anyone. |
| 5 | **Price the spill cover both ways** | , trailers only and the full 27 vehicles. |
| 6 | **Three tracking units this week** | , then the 179 unit conversation. |

### GET IN WRITING, FROM EACH PARTY

**OUTsurance (Virgil Niekerk):** does the hazardous materials exclusion apply to this fleet? Why does "Containers used" read NO on OT78078997 and YES on OT89649119? Why do the fleet sections print "incidents in the last ten years: None" when page 6 lists 38 of them? Price defective products, credit shortfall, and EIL on the 124 trailers.

**Alpha (Sandile Ndlovu, FSP Commercial On-Line, Tanya Kapp):** requote without the towing section. Clean-up at R5,000,000 across trucks AND trailers. Passenger liability on the heavy section. Confirm it is rated on the 3 year claims record, which the quote still only asks for. Its renewal date reads 01/10/2026 but the two policies renew 10 June 2027 and 1 September 2027, so a move cancels both mid-term. And it names Bakers Tankers alone.

**ONE (motor HCV/1304264 + marine MARN/1305840):** price cross border liability cover and EIL (state the spillage limit), confirm flat R30,000 over the 5%-of-value endorsement and drop the night loading, add Cartrack beside ONETRAK, declare the fuel on the motor proposal, name all three entities, give inception dates, and on the GIT confirm the commission and add driver fidelity R1,620,000.

**Envirosure (Adelle Hartley):** reconfirm the lapsed quote, put Cartrack's broker code on it, and price a trailers-only version.

**CLP (JP Liebenberg):** name all three entities. Confirm whether scrap metal and scrap batteries are High Risk Cargo. Fix "commencing on TBA". And correct the loss history, which reads clean for three years against a motor record with eight incidents in 2022 alone.

### ADMIN TO CLEAN UP

Address is **15 Nereeniging Road, Alberton 1449** on Santam and **15 Vereeniging Road, Alberton 1451** everywhere else, and OT78078997 prints "Vereeninging" on its own page 2. **VAT 4720248410 and reg 2008/014516/07 are blank on both OUTsurance schedules**, so neither can serve as a tax invoice. Loss of keys is R3,000 on one policy and R10,000 on the other. Two MAN TGA trucks (JXH251MP, JXH256MP) are **third party only**, R65.15/mo between them, with no own damage, theft or hijack cover. Confirm that is deliberate.
